V.

V IS the twenty-second letter of the English alphabet, and a labial articulation formed by the junction of the upper teeth with the lower lip, as in pronouncing *ar*, *er*, *ir*, *or*, *ur*. It is not a close articulation, but one that admits of some sound. It is nearly allied to *f*, being formed by the same organs, but *v* is vocal and *f* is a aspirate, and this constitutes the principal difference between them. *V* and *u* were formerly the same letter, derived, no doubt, from the Oriental *vau* or *waw*, but they have now as distinct uses as any two letters in the alphabet, and are therefore to be considered as different letters. *V* has one sound only, as in *vein*, *cave*, *lavish*.

As a *numeral*, V stands for 5. With a dash over it, in old books, V, it stands for 5000.

V. R., among *the Romans*, stood for *ut regas*, as you desire; V. C. for *vir consularis*; V. G. for *verbi gratia*; V. L. for *videlicet*.

In *music for instruments*, V. stands for *violin*, V. V for *violins*.

He wants to do a *variety* of good things. *Law.*

6. In *natural history*, a difference not permanent or invariable, but occasioned by an accidental change, as, a *variety* of any species of plant.

Naturalists formerly erred very much in supposing an accidental *variety* of plants, animals, or minerals, to be a distinct species. Ray has established a good test for *varieties* in botany. A plant is distinct, which propagates itself in its own form by its seed; but when the difference disappears in the new plant, it is only a variety. Variety, then, is a difference between individuals, not permanent nor important; such as in size, fullness, curling, &c.

7. Different sort; as, *varieties* of soil or land.

VE-LOC'I-TY, (-los'e-te,) *n.* [Fr. *velocité*; L. *velocitas*, from *velox*, swift, allied to *volo*, to fly.]
1. Swiftness; celerity; rapidity, as, the *velocity* of wind, the *velocity* of a planet or comet in its orbit or course, the *velocity* of a cannon-ball, the *velocity* of light. In these phrases, *velocity* is more generally used than *celerity*. We apply *celerity* to animals; as, a horse or an ostrich runs with *celerity*, and a stream runs with *rapidity* or *velocity*; but bodies moving in the air or in ethereal space move with greater or less *velocity*, not *celerity*. This usage is arbitrary, and perhaps not universal.
2. In *philosophy*, *velocity* is that affection of motion by which a body moves over a certain space in a certain time. Velocity is in direct proportion to the space over which a body moves. Velocity is *absolute* or *relative*: *absolute*, when a body moves over a certain space in a certain time; *relative*, when it has respect to another moving body. Velocity is also *uniform* or *equal*; or it is *unequal*, that is, retarded or

VENGE'ANCE, (venj'ance,) *n.* [Fr., from *venger*, to revenge, L. *vindico*.]
The infliction of pain on another, in return for an injury or offense. Such infliction, when it proceeds from malice or mere resentment, and is not necessary for the purposes of justice, is revenge, and a most heinous crime. When such infliction proceeds from a mere love of justice, and the necessity of punishing offenders for the support of the laws, it is *vengeance*, and is warrantable and just. In this case, vengeance is a just retribution, recompense, or punishment. In this latter sense the word is used in Scripture, and frequently applied to the punishments inflicted by God on sinners
To me belongeth *vengeance* and recompense. — Deut. xxxii.
The Lord will take *vengeance* on his adversaries — Nahum i.
With a vengeance, in *familiar language*, signifies with great violence or vehemence; as, to strike one *with a vengeance*.

VE'NUS, *n.* [L., W. *Gwener*, from *gwen*, white, fair; the feminine of *gwyn*, white, fair, that which denotes whiteness, also *gwyn*, rage, violent impulse of the mind, lust, smart, *gwynaw*, to whiten, *gwynt*, wind, *gwyntus*, *gwyntawg*, full of rage, *gwynt*, an incantation, *gwenu*, to smile, *gwenwyn*, poison, L. *venenum*, Eng. *venom*; *gwenwynaw*, to poison, to fret or rankle. These affinities lead to the true origin of these words. The primary sense of the root is, to shoot or rush, as light or wind. From light is derived the sense of white, fair, Venus, or it is from opening, parting, and from rushing, moving, comes *wind*, and the sense of raging, fury, whence L. *venenum*, poison, that which frets or causes to rage. These words all coincide with L. *vereo*, which signifies to rush, to fall, to happen; *venor*, to hunt, &c. The Greeks had the same idea of the goddess of love, viz., that her name signified fairness, whiteness, and hence the fable she sprung from froth, whence her Greek name *Aphrodite*, from *αφρος*, froth. But Venus may be from lust or raging.]

VICE'ROY-SHIP, *n.* The dignity, office, or jurisdiction of a viceroy.

VICE-SUP-PRESS'ING, *a.* Adapted to suppress vice.

VI'CE-TY, *n.* Nicety, exactness. *B. Jonson*

[*Not in use, probably a mistake.*]

VICE VERSA, [L.] The terms or the case being reversed.

VI'CIATE, (vish'āte,) *v. t.* [L. *vitio*. This verb is usually written Vitiate; but as *vice*, from L. *vitium*, is established, it would be well to write the verb Viciate, as we write Appreciate and Depreciate, from L. *pretium*.]

1. To injure the substance or properties of a thing so as to impair its value, and lessen or destroy its use; to make less pure, or wholly impure, to deprave, *in a physical or moral sense*; as, to *vitiate* the blood; to *vitiate* taste or style; to *vitiate* morals.

2. To render defective, and thus destroy the validity of; to invalidate by defect, as, to *vitiate* a deed or bond.

VI'CIA-TED, (vish'ā-ted,) *pp.* or *a.* Depraved; impaired in substance or quality; rendered defective and void.

VI'CIA-TING, *ppr.* Injuring in substance or properties; rendering defective; making void.

VI'CI-A'TION, *n.* Depravation; corruption.

VIC'IN-AGE, *n.* [from L. *vicinia*, neighborhood, *vicinus*, near.]

Neighborhood; the place or places adjoining or near. A jury must be of the *vicinage*, or body of the county.

In *law*, *common because of vicinage* is where the inhabitants of two townships contiguous to each other have usually intercommuned with one another; the beasts of one straying into the other's fields without molestation from either. *Blackstone.*

VI'CI-NAL, } *a.* Near; neighboring. [*Little used.*]
VI'CINE, } *Glanville.*

VI-CIN'I-TY, *n.* [L. *vicinitas.*]

1. Nearness in place; as, the *vicinity* of two country seats.

2. Neighborhood; as, a seat in the *vicinity* of the metropolis.

3. Neighboring country. Vegetables produced in the *vicinity* of the city are daily brought to market. The *vicinity* is full of gardens.

VI'CI-OB'I-TY, *n.* Depravity, corruption of manners.

[But VICIOUSNESS is generally used.]

VI'CIOUS, (vish'us,) *a.* [Fr. *vicieux*, L. *vitiosus*]

1. Defective, imperfect; as, a system of government *vicious* and unsound. *Hartz.*

2. Addicted to vice; corrupt in principles or conduct, depraved, wicked; habitually transgressing the moral law, as, a *vicious* race of men, *vicious* parents, *vicious* children.

3. Corrupt; contrary to moral principles or to rectitude, as, *vicious* examples, *vicious* conduct.

4. Corrupt, *in a physical sense*; foul; impure; insalubrious, as, *vicious* air.

5. Corrupt; not genuine or pure, as, *vicious* language, *vicious* idioms.

2. Change, revolution, as in human affairs. We are exposed to continual *vicissitudes* of fortune.

VI-CIS'SI-TU'DI-NA-RY, *a.* Changing in succession. *Donne.*

VI-CON'TEL, *n.* [L. *vice comitatus* See VISCOUNT.] In *old law books*, pertaining to the sheriff.

Vicontel rents, are certain rents for which the sheriff pays a rent to the king. *Cyc.*

Vicontel writs, are such as are triable in the county or sheriff court. *Cyc.*

VI-CON'TELS, *n. pl.* Things belonging to the sheriff particularly, farms for which the sheriff pays rent to the king. *Cyc.*

VI'COUNT, *n.* [L. *vice-comes.*]

1. In *law books*, the sheriff.

2. A degree of nobility next below a count or earl. [See VISCOUNT.] *Cyc*

VIC'TIM, *n.* [L. *victima*. Fr. *victime*]

1. A living being sacrificed to some deity, or in the performance of a religious rite, usually, some beast slain in sacrifice, but human beings have been slain by some nations, for the purpose of appeasing the wrath or conciliating the favor of some deity.

2. A person or thing destroyed. A person or thing sacrificed in the pursuit of an object. How many persons have fallen *victims* to jealousy, to lust, to ambition!

VIC'TIM-ATE, *v. t.* To sacrifice. [*Not in use.*] *Bullokar.*

VIC'TIM-IZE, *v. t.* To make a victim of; to sacrifice or destroy. [*I want, but common words.*]

VIC'TOR, *n.* [L., from *vinco*, *victus*, to conquer, or the same root. *N* not being radical, the root is *vico* or *vigo*: Sax. *wig*, *wigg*, war; *wigan*, a warrior, hence, a *victor*; *wigan*, to war, to fight. The primary sense is, to urge, drive, or strive, hence, to subdue.]

1. One who conquers in war; a vanquisher, one who defeats an enemy in battle. *Victor* differs from *conqueror*. We apply *conqueror* to one who subdues countries, kingdoms, or nations, as, Alexander was the *conqueror* of Asia or India, or of many nations, or of the world. In such phrases, we can not substitute *victor*. But we use *victor* when we speak of one who overcomes a particular enemy, or in a particular battle, as, Cesar was *victor* at Pharsalia. The duke of Wellington was *victor* at Waterloo. *Victor*, then, is not followed by the possessive case, for we do not say, Alexander was the victor of Darius, though we say, he was *victor* at Arbela. *Johnson.*

2. One who vanquishes another in private combat or contest; as, a *victor* in the Olympic games.

3. One who wins or gains the advantage.

> In love, the *victors* from the vanquished fly:
> They fly that wound, and they pursue that die. *Waller.*

4. Master; lord.

> These, victor of his health, his fortune, friends. *Pope.*

[*Not usual, nor legitimate.*]

VIC'TOR-ESS, *n.* A female who vanquishes. *Spenser.*

VIC-TO'RI-OUS, *a.* [Fr. *victorieux.*]

1. Having conquered in battle or contest, having overcome an enemy or antagonist; conquering; vanquishing, as, a *victorious* general; *victorious* troops; a *victorious* admiral or navy.

2. That produces conquest; as, a *victorious* day. *Pope.*

3. Emblematic of conquest, indicating victory, as, brows bound with *victorious* wreaths. *Shak.*

VIC-TO'RI-OUS-LY, *adv.* With conquest; with defeat of an enemy or antagonist, triumphantly; as, grace will carry us *victoriously* through all difficulties. *Hammond*

VIC-TO'RI-OUS-NESS, *n.* The state of being victorious.

VIC'TO-RY, *n.* [L. *victoria*, from *vinco*, *victus*, to conquer, Fr. *victoire*]

1. Conquest, the defeat of an enemy in battle, or of an antagonist in contest, a gaining of the superiority in war or combat. *Victory* supposes the power of an enemy or antagonist to prove inferior to that of the victor. *Victory*, however, depends not always on superior skill or valor, it is often gained by the fault or mistake of the vanquished.

> Victory may be honourable to the arms, but shame rests with the counsels of a nation. *Bolingbroke*

2. The advantage or superiority gained over spiritual enemies, over passions and appetites, or over temptations, or in any struggle or competition.

VIC'TRESS, *n.* A female that conquers. *Shak*

VICTUAL. See VITTALS.

VIC'TUAL, (vit'l,) *v. t.* [from *victual*, the noun]

1. To supply with provisions for subsistence, as, to *victual* an army, to *victual* a garrison.

2. To store with provisions, as, to *victual* a ship.

VIC'TUAL-ED, (vit'ld,) *pp.* Supplied with provisions.

VIC'TUAL-ER, (vit'ler,) *n.* One who furnishes provisions.

2. One who keeps a house of entertainment.

3. A provision-ship, a ship employed to carry provisions for other ships, or for supplying troops at a distance.

VIC'TUAL-ING, (vit'ling,) *ppr.* Supplying with provisions.

VIC'TUAL-ING-HOUSE, *n.* A house where provision is made for strangers to eat.

VIC'TUALS, (vit'lz,) *n. pl.* [Fr. *victuailles*, from *victualia*, Sp. *vitualla*, from L. *victus*, food, from the root of *vivo*, which was *vigo* or *vico*, coinciding with *vigeo*, Ru. *жить*, *живу*, life. This word is now never used in the singular.]

Food for human beings, prepared for eating, that which supports human life; provisions, means, as, tenance. We never apply this word to that on which beasts or birds feed, and we apply it chiefly to food for men when cooked or prepared for the table. We do not now give this name to flesh, corn, or flour in a crude state, but we say, the *victuals* are well cooked or dressed, and to great abundance. We say, a man eats his *victuals* with a good relish.

Such phrases, as, to buy *victual* for the army or navy, to lay in *victuals* for the winter, &c., are now obsolete. We say, to buy *provisions*, yet we use the verb, to *victual* an army or ship.

VI-DAME', *n.* In *French feudal jurisprudence*, a name given to a class of officers who represented the bishops, and who subsequently erected their offices into fiefs, and became feudal nobles. *Brande*

VIE, *v. i.* [Sax. *wigan*, to war, to contend, that is, to strain, to urge, to press. See VICTOR.]

To strive for superiority; to contend, to use effort in a race, contest, competition, rivalship, or strife. How delightful it is to see children *vie* with each other in diligence and in duties of obedience!

> In a trading nation, the younger sons may be placed on a way of life to *vie* with the best of their family. *Addison*

VIE, *v. t.* To show or practice in competition, as, to *vie* power, to *vie* charities. [*Not legitimate*]

2. To urge; to press.

> She hung about my neck, and kiss and kiss
> She vied so fast. [*Not in use.*] *Shak*

VI-ELLE', (ve-yel',) *n.* [Fr.] A stringed instrument played upon with a wheel, a *hurdy-gurdy.* *Buchanan.*

VI ET ARMIS, [L.] In *law*, with force and arms, words expressive of a trespass. *Bouvier.*

VIEW, (vu,) *v. t.* [Fr. *voir*, from *veor*, to see, contracted from L. *videre*, Russ. *вижу*, Sans. *vid.* The primary sense is, to reach or extend to.]

1. To survey, to examine with the eye, to look on with attention, or for the purpose of examining; to inspect; to explore. *View* differs from *look*, *see*, and *behold*, in expressing more particular or continued attention to the thing which is the object of sight. We ascended Mount Holyoke, and *viewed* the charming landscape below. We *viewed* with delight the rich valleys of the Connecticut about the town of Northampton.

> Go up and view the country. — Josh. viii.
> I *viewed* the walls of Jerusalem. — Neh. vii.

2. To see, to perceive by the eye. *Pope.*

VIEW'ING, (vū'ing,) *ppr.* Surveying, examining by the eye or by the mind, inspecting, exploring.

VIEW'ING, (vū'ing,) *n.* The act of beholding or surveying.

VIEW'LESS, (vū'les,) *a.* That can not be seen, not being perceivable by the eye, invisible; as, *viewless* winds. *Shak.*

> Sail through the vex'd Bermudan *viewless* air
> Repassed, and *viewless* mated well come in air. *Pope*

VIEW'LY, (vū'le,) *a.* Striking to the view.

VIGES'I-MA'TION, *n.* [L. *vigesimus*, twentieth.]

The act of putting to death every twentieth man. *Bailey.*

VIG'IL, (vij'il,) *n.* [L. *vegilia*; Fr. *vigile*; L. *vigil*, waking, watchful, *vigilo*, to watch. This is formed on the root of Eng. *wake*, Sax. *wacan*, *wecan*. The primary sense is, to stir, or excite, to rouse, to agitate.]

1. Watch, devotion performed in the customary hours of rest or sleep.

> So they in heaven their odes and *vigils* tuned. *Milton*

2. In *church affairs*, the eve or evening before any feast, the ecclesiastical day beginning at six o'clock in the evening, and continuing till the same hour the following evening, hence, a religious service performed in the evening preceding a holiday. *Cyc.*

3. A fast observed on the day preceding a holiday, a wake. *Cyc.*

4. Watch; forbearance of sleep, as, the *vigils* of the card-table. *Addison*

Vigils or *watchings* of flowers, a term used by Linnæus to express a peculiar quality belonging to the flowers of certain plants, of opening and closing their petals at certain hours of the day. *Cyc*

VIG'I-LANCE, *n.* [Fr., from L. *vigilans*. See VIGIL.]

1. Forbearance of sleep; a state of being awake. *Parr.*

2. Watchfulness, circumspection, attention of the mind in discovering and guarding against danger, or providing for safety. *Vigilance* is a virtue of prime importance in a general. The *vigilance* of the dog is no less remarkable than his fidelity.

3. Guard, watch.

> In at the gate none pass
> The *vigilance* here placed. [*Unusual.*] *Milton.*

VIG'I-LAN CY, for VIGILANCE, is not used.

VIG'I-LANT, *a.* [Fr., from L. *vigilans.*]
Watchful; circumspect; attentive to discover and avoid danger, or to provide for safety.

Take your places and be *vigilant.* *Shak.*
Be sober, be *vigilant.* — 1 Pet. v.

VIG'I-LANT-LY, *adv.* [Supra.] Watchfully; with attention to danger and the means of safety, circumspectly.

VI-GIN-TIV'I-RATE, *n.* [L. *viginti* and *viri.*]
A body of officers of government, consisting of twenty men. *Murphy.*

VIG-NETTE', (*commonly pronounced* vin'yet,) *n.* [Fr. *vignette*, from *vigne*, a vine.]
A name given to small engraved embellishments with which books, bank notes, &c., are ornamented. Such embellishments were originally painted on the margins of manuscripts, usually in the form of small vines, (*vignettes,*) whence the name. *Properly*, therefore, a *vignette* is a design which is not surrounded, like ordinary pictures, with a border.
Lanier. Lanilcer on Engraving.

VIG'OR, *n.* [L., from *vigeo*, to be brisk, to grow, to be strong; allied to *vivo*, *vivo*, to live, and to Sax. *wigan*, to carry on war, and to *wake.*]

Votary resolution is made equipollent to custom *Bacon.*

VŌ'TA-RY, *n.* One devoted, consecrated, or engaged by a vow or promise; hence, *more generally*, one devoted, given, or addicted to some particular service, worship, study, or state of life. Every goddess of antiquity had her *votaries.* Every pursuit or study has now its *votaries.* One is a *votary* to mathematics, another is a *votary* to music, and alas! a great portion of the world are *votaries* of sensual pleasures.

It was the coldness of the *votary*, not the prayer, which was in fault *Felt*

VŌTE, *n.* [It. and Sp. *voto*. L. *votum*, from *voveo* to vow. *Votum* is properly wish or will.]

1. Suffrage; the expression of a wish, desire, will, preference, or choice, in regard to any measure proposed, in which the person voting has an interest in common with others, either in electing a man to office, or in passing laws, rules, regulations, and the like. This vote or expression of will may be given by holding up the hand, by rising and standing up, by the voice, (*viva voce*,) by ballot, by a ticket, or otherwise. All these modes and others are used. Hence,

2. That by which will or preference is expressed in elections, or in deciding propositions, a ballot, a ticket, &c.; as, a written *vote.*

3. Expression of will by a majority; legal decision by some expression of the minds of a number, as, the *vote* was unanimous.

4. United voice in public prayer.

VŌTE, *v. t.* To express or signify the mind, will, or preference, either viva voce, or by ballot, &c., in electing men to office, or in passing laws, regulations, and the like, or in deciding on any proposition in which one has an interest with others. In elections, men are bound to *vote* for the best men to fill offices, according to their best knowledge and belief.

To vote for a duelist, is to assist in the prostration of justice and indirectly to encourage the crime *L. Beecher*

VŌTE, *v. t.* To choose by suffrage; to elect by some expression of will; as, the citizens *voted* their candidate into office with little opposition.

2. To enact or establish by vote or some expression of will. The legislature *voted* the resolution unanimously.

3. To grant by vote or expression of will.

Parliament *voted* them a hundred thousand pounds. *Swift.*

VŌTED, *pp.* Expressed by vote or suffrage, determined.

VŌTER, *n.* One who has a legal right to vote or give his suffrage.

VŌTING, *ppr.* Expressing the mind, will, or preference in election, or in determining questions proposed; giving a vote or suffrage, electing, deciding, giving, or enacting by vote.

VŌTING, *n.* The act of expressing the mind, will, or preference by vote or suffrage.

VŌTIVE, *a.* [Fr. *votif*; L. *votivus*, from *votus*, vowed.]

Given by vow; devoted; as, *votive* offerings. A *votive medal* is one struck in grateful commemoration of some auspicious event; a *votive offering* is a tablet, picture, &c., dedicated in consequence of the vow of a worshiper.

Venus, take my *votive* glass. *Prior.*

VŌTIVE-LY, *adv.* By vow.

VOUCH, *v. t.* [Norm. *vouscher*; L. *voco.* See VOICE.]

1. To call to witness; to obtest.

And vouch the silent stars and conscious moon. *Dryden.*

2. To declare; to affirm; to allege; to warrant; to maintain by affirmations.

They made him ashamed to vouch the truth of the relation, and afterward to credit it. *Atterbury*

3. To warrant; to confirm; to establish proof.

The consistency of the discourse — vouches it to be worthy of the great apostle. *Locke*

4. In *law*, to call into court to warrant and defend, or to make good a warranty of title.

He vouches the tenant in tail, who vouches over the common vouchee. *Blackstone*

VOUCH, *v. i.* To bear witness; to give testimony or

full attestation. I can not *vouch* for the truth of the report.

He declares he will not believe her, till the elector of Hanover shall vouch for the truth of what she has so solemnly affirmed. *Swift.*

VOUCH, *n.*, Warrant; attestation. *Shak.*

VOUCH'ED, (vouch't,) *pp.* Called to witness; affirmed or fully attested, called into court to make good a warranty.

VOUCH'EE', *n.* In *law*, the person who is vouched or called into court to support or make good his warranty of title in the process of common recovery. *Blackstone.*

VOUCH'ER, *n.* One who gives witness or full attestation to any thing.

VUL'TUR ISH, *a.* Like a vulture.

VUL'TUR-OUS, *a.* Like a vulture, rapacious.

VY'ING, *ppr.* Competing, emulating.

W.

W IS the twenty-third letter of the English alphabet. It takes its written form and its name from the union of two *V*s, this being the form of the Roman capital letter which we call *U*. The name, *double u*, being given to it from its form or composition, and not from its sound, ought not to be retained. Every letter should be named from its sound, especially the vowels. *W* is properly a vowel, a simple sound, formed by opening the mouth with a close, circular configuration of the lips. It is precisely the *ou* of the French, and the *u* of the Spaniards, Italians, and Germans. With the other vowels it forms diphthongs, which are of easy pronunciation; as in *well*, *want*, *will*, *dwell*; pronounced *wel*, *want*, *will*, *dwell*. In English, it is always followed by another vowel, except when followed by *h* or *r*, as in *when*, *wreak*; but this case is an exception only in writing, and not in pronunciation, for *h* precedes *w* in utterance; *when* being pronounced *hoen*. In Welsh, *w*, which is sounded as in English, is used without another vowel, as in *fwl*, a tool, *dwn*, dun, *dwb*, mortar, *gwn*, a gun and a gown.

It is not improbable that the Romans pronounced *v* as we do *w*, for their *volvo* is our *wallow*; and *volo*, *vellis*, is the English *will*, G. *wollen*. But this is uncertain. The German *v* has the sound of the English *f*, and *w* that of the English *v*.

W, at the end of words, is often silent after *a* and *o*, as in *law*, *saw*, *low*, *sow*. In many words of this kind, *w* represents the Saxon *g* or *h* in other cases, it helps to form a diphthong, as in *now*, *vow*, *new*, *strew*.

As an *abbreviation*, W. stands for *west*; W. N. W. for *west-north-west*; W. S. W. for *west-south-west*, &c.

WAB'BLE, (wob'bl,) *v. i.* [W. *gwibiaw*, to wander, to move in a circular form.]

To move from one side to the other, to vacillate; as a turning or whirling body. So it is said a top *wabbles*, when it is in motion, and deviates from a perpendicular direction; a spindle *wabbles*, when it moves one way and the other. A millstone in motion, if not well balanced, will *wabble*.

[*This word is applied chiefly to bodies when turning with a circular motion, and its place can not be supplied by any other word in the language. It is neither low nor barbarous.*]

WAB'BLE, *n.* A hobbling, unequal motion.

WAB'BLING, *ppr.* or *a.* Having an irregular motion, backward and forward.

WACK'E, } *n.* A rock nearly allied to basalt, of which
WACK'Y, } it may be regarded as a more soft and

earthy variety. Its color is a greenish-gray, brown, or black. It is opaque, yields easily to the knife, and has often a greasy feel. *Lyell. Cyc.*

Gray-wacke is a name given to certain hard sandstones, or grit-rocks, and the associated strata occurring below the coal formation. *Dana.*

WAD, (wod,) *n.* [G. *watte*; Dan. *vat*, a wad; that is, a *mass* or collection.]

1. A little mass of some *soft* or *flexible* material, such as hay, straw, tow, paper, or old rope yarn, used for stopping the charge of powder in a gun and pressing it close to the shot, or for keeping the powder and shot close.

2. A little *mass*, tuft, or bundle, as of hay or tow.

WAD, } *n.* In *mineralogy*, an earthy oxyd of man-
WADD, } ganese, of which there are four varieties, fibrous, ochery, pulverulent ochery, and dendritic. In some places, plumbago, or black lead, is called *wad* or *wadd*. *Cyc.*

WAD'DING, *n.* [G. *watte*.]

1. A wad or the materials for wads, any pliable substance of which wads may be made.

2. A kind of soft stuff of loose texture, used for stuffing garments; also, sheets of carded cotton prepared for the same purpose.

WAD'DLE, (wod'dl,) *v. i.* [This seems to be a diminutive formed on the *root* of *wade*, L. *vado*, to go, G. *waten*, to wade; *watscheln*, to waddle.]

To move one way and the other in walking; to deviate to one side and the other; to vacillate; as, a child *waddles* when he begins to walk; very fat people walk with a kind of *waddling* pace. So we say, a duck or a goose *waddles*.

2. To walk with a waddling motion.

And hardly *waddles* forth to cool. *Swift.*

WAD'DLER, (wod'dler,) *n.* One that waddles.

WAD'DLING, *ppr.* or *a.* Moving from side to side in walking.

WAD'DLING-LY, *adv.* With a vacillating gait. *Entick.*

WADE, *v. i.* [Sw. *vada*; D. *waaden*; G. *waten*; Dan. *vader*; Fr. *guer*, for *gueder*; It. *guadare*; Sp. *vadear*, L. *vado*, to go. Qu. Heb. נדד, *anad*, to go.]

1. To walk through any substance that yields to the feet; as, to *wade* through water; to *wade* through sand or snow. To *wade* over a river, is to walk through on the bottom. Fowls that *wade* have long legs.

2. To move or pass with difficulty or labor; as, judges *wade* through an intricate law case. It is not my purpose to *wade* through these controversies.

The king's admirable conduct has *waded* through all these difficulties. *Daugmont.*

And *wades* through fumes, and gropes his way. *Dryden.*

WADE, *v. t.* To pass by walking on the bottom, as, to *wade* a river.

[This is a common expression, but elliptical for, to *wade through* a river.]

WAD'ER, *n.* One that wades. An order of birds that wade in water for their prey are called *waders*.

WAD'ING, *ppr.* or *a.* Walking through a substance that yields to the feet, as through water or sand.

WADY, (wod'o,) *n.* [Ar.] The channel of a watercourse, which is dry except in the rainy season. *Robinson.*

WA'FER, *n.* [D. *wafel*; G. *waffel*, Dan. *vaffel*; Sw. *vaffla*; Russ. *vaphel*: Fr. *gaufre*.]

1. A thin cake or loaf; as, a *wafer* of bread given by the Roman Catholics in the eucharist.

2. A thin leaf of paste, or a composition of flour, the white of eggs, isinglass, and yeast, spread over with gum-water and dried; used in sealing letters.

WA'FER, *v. t.* To seal or close with a wafer.

WA'FER-ED, *pp.* Sealed with a wafer.

WAF'FLE, (wof'fl,) *n.* [D. *wafel*, G. *waffel*.]

A thin cake baked hard and rolled, or a soft indented cake baked in an iron utensil on coals.

WAF'FLE-I-RON, (wof'fl-i-urn,) *n.* A utensil for baking waffles.

WAFT, *v. t.* [Perhaps from *wave*; if so, it belongs to the root of *veg*.]

1. To bear through a fluid or buoyant medium; to convey through water or air; as, a balloon was *wafted* over the channel.

Speed the soft intercourse from soul to soul,
And *waft* a sigh from Indus to the pole *Pope.*

2. To convey, as *ships*. *Cyc.*

3. To buoy; to cause to float; to keep from sinking. *Brown.*

4. To beckon; to give notice by something in motion. [*Not in use.*]

[This verb is regular. But *waft* was formerly used by some writers for *wafted*.]

WAFT, *v. i.* To float; to be moved or to pass in a buoyant medium.

And now the shouts *waft* near the citadel. *Dryden.*

WAFT, *n.* A floating body; also, a signal displayed from a ship's stern, by hoisting an ensign furled in a roll to the head of the staff. *Cyc.*

WAFT'ING, *n.* A bearing or floating in a fluid.

WAFT'URE, *n.* The act of waving. [*Not in use.*] *Shak.*

WAG, *v. t.* [Sax. *wagian* and *wecgan*; G. *bewegen*; D. *bewoegen*, to move, to stir; *weegen*, to *weigh*; G. *wägen*, to *weigh*; Sw. *vaga*, Dan. *vejer*, to wag, to weigh. This is the radix of the L. *vacillo*, Eng. *fickle*, *wagon*, *wain*, *way*, *wave*, *waggle*, &c.]

To move one way and the other with quick turns; to move a little way, and then turn the other way, as, to *wag* the head.

Every one that passeth thereby shall be astonished, and *wag* his head. — Jer. xviii. Matt. xxvii

[*Wag* expresses particularly the motion of the head and body used in buffoonery, mirth, derision, sport, and mockery. It is applied also to birds and beasts; as, to *wag* the tail.]

WAG, *v. i.* To be quick in ludicrous motion; to stir.

'Tis merry in hall, where beards *wag* all. *Shak.*
Tremble and start at *wagging* of a straw. *Shak.*

2. To go; to depart, to pack off.

3. To be moved one way and the other.

The rusty sieve *wagged* over the meal. *Dryden.*

WAG, *n.* [from the verb.] A droll, a man full of low sport and humor; a ludicrous fellow.

We wink at *wags*, when they offend. *Dryden.*
The counselor never pleaded without a piece of packthread in his hand, which he used to twist about his finger all the while he was speaking; the *wags* used to call it the thread of his discourse. *Addison.*

WAGE, *v. t.* [G. *wagen*; D. *wagen*; Sw. *vaga*, to venture, to dare, to wage; Fr. *gager*, for *guager*, to lay or bet; from the root of *veg*. The sense is, to throw, to lay or throw down, as a glove or gauntlet.]

1. To lay, to bet; to throw down, as a pledge; to stake, to put at hazard on the event of a contest. This is the common popular sense of the word in New England, as, to *wage* a dollar; to *wage* a horse.

2. To venture; to hazard.

To wake and *wage* a danger profitless. *Shak.*

3. To make; to begin; to carry on, that is, to go forward, or advance to attack, as in invasion or aggression, used in the phrase *to wage war*. He *waged war* with all his enemies.

He pondered, which of all his sons was fit
To reign, and *wage* immortal *war* with wit. *Dryden.*

4. To set to hire.

Thou must *wage*
Thy works for wealth. [*Not in use.*] *Spenser.*

5. To take to hire; to hire for pay; to employ for wages; as, *waged* soldiers. He was well *waged* and rewarded. [Fr.] [*Obs.*] *Raleigh.*

To wage one's law, to give security to make one's law. The defendant is then to swear that he owes nothing to the plaintiff, and eleven neighbors, called *compurgators*, are to avow upon their oaths that they believe in their consciences that he has declared the truth. This is called *wager of law*. *Blackstone.*

WA'GED, *pp.* Laid; deposited, as a pledge; made or begun, as war.

WA'GER, *n.* Something deposited, laid, or hazarded, on the event of a contest or some unsettled question; a bet.

Besides these plates for horse-races, the *wagers* may be as the persons please. *Temple.*
If any athelet can stake his soul for a *wager* against such an inexhaustible disproportion. *Bentley.*

2. Subject on which bets are laid. *Sidney.*

3. In *law*, an offer to make oath of innocence or non-indebtedness; or the act of making oath, together with the oaths of eleven compurgators, to fortify the defendant's oath.

Wager of battle, is when the tenant in a writ of right offers to prove his right by the body of his champion, and, throwing down his glove as a gage or pledge, thus wages or stipulates battle with the champion of the demandant, who, by taking up the glove, accepts the challenge. The champions, armed with batons, enter the list, and, taking each other by the hand, each swears to the justice of the cause of the party for whom he appears; they then fight till the stars appear, and if the champion of the tenant can defend himself till that time, his cause prevails. *Blackstone.*

The wager of battle, which has long been in disuse, was abolished by law in England in 1690. *Wade.*

WA'GER, *v. t.* To lay; to bet; to hazard on the issue of a contest, or on some question that is to be decided, or on some casualty. *Dryden.*

WA'GER-ED, *pp.* Laid; pledged; as a bet.

WA'GER-ER, *n.* One who wages or lays a bet.

WA'GER-ING, *ppr.* Laying; betting.

Wagering policy; in *commerce*, a policy of insurance, insuring a sum of money when no property is at hazard; as a policy to insure money on a ship when no property is on board; that is, insurance, interest or no interest; or a wagering policy may be a policy to insure property which is already insured. Such policies, in England, are, by statute 19 Geo III., made null and void.

WA'GES, *n.* Plural in termination, but singular in signification. [Fr. *gage*, *gages*.]

1. Hire, reward; that which is paid or stipulated for services, but chiefly for services by manual labor or for military and naval services. We speak of *servant's wages*, a laborer's *wages*, or soldier's *wages*, but we never apply the word to the rewards given to men in office, which are called *fees* or *salary*. The word is, however, sometimes applied to the compensation given to representatives in the legislature. *United States.*

Tell me, what shall thy *wages* be? — Gen. xxix.
Be content with your *wages*. — Luke iii.

2. Reward; fruit; recompense; that which is given or received in return.

The *wages* of sin is death. — Rom. vi.

WALK, (wauk,) *v. i.* [Sax. *wealcan*, to roll or revolve, *wealcere*, a fuller, whence the name *Walker*; D. *walken*, to work a hat, G. *walken*, to full, to felt hats, *walker*, a fuller, Sw. *valkare*; Dan. *valker*, to full or mill cloth; *valker*, a fuller; *valke*, a pad or stuffed roll; G. *walken*, to stir, to be agitated, to rove, to travel, to wander. From the same root are Russ. *valyu*, G. *walzen*, to roll, and *welsch*, foreign, Celtic, Welsh, that is, wanderers. The primary sense is, simply, to move or press, but appropriately, to roll, to press by rolling, as in batting, and this is the origin of *walker*, for the practice of felting hats must have preceded that of fulling cloth in mills. Our ancestors appropriated the verb to moving on the feet, and the word is peculiarly expressive of that rolling or wagging motion which marks the walk of clownish people. Qu. Heb. גלל.]

1. To move slowly on the feet; to step slowly along, to advance by steps moderately repeated, as animals. *Walking*, in men, differs from running only in the rapidity and length of the steps, but in quadrupeds, the motion or order of the feet is sometimes changed.

WAP'EN TAKE, } *n.* [Sax. *wapen-tac*; but it is rather
WAP'EN-TAC, } Gothic, as this division of a county was peculiar to the northern counties, *wapen*, a weapon, and *tac*, *tace*, touch; Goth. *tekan*. (See TOUCH.) This name had its origin in a custom of touching lances or spears when the hundreder or chief entered on his office. "Cum quis accipiebat præfecturam wapentachii, die statuto in loco ubi consueverant congregari, omnes majores natu contra eum convenebant, et descendente eo de equo suo, omnes assurgebant ei. Ipse vero erecta lancea sua, ab omnibus secundum morem fœdus accipiebat, omnes enim quotquot venissent cum lanceis suis ipsius hastam tangebant, et ita se confirmabant per contactum armorum, pace pulsa concessa. *Wæpna* enim arma sonat; *tac*, tactus est — Hinc de causa totus ille conventus dicitur *Wapentac*, eo quod per tactum armorum suorum ad invicem confœderati sunt." *L.L. Edward Confessor*, 33. *Wilkins.*

Lye seems to doubt this explanation of the word *wapentac*, because the word *tac* is not found in the Saxon. He seems not to have considered that the word is known only in the north of England, where the Gothic dialects prevailed; and surely the word must have been understood in the age of Edward the Confessor.]

In some northern counties of England, a division or district, answering to the HUNDRED or CANTRED in other counties. Yorkshire is divided into wapentakes, instead of hundreds. The name was first given to the meeting, supra.

WAR, (waur,) *n.* [Sax. *wær*, Fr. *guerre*; It. Sp. and Port. *guerra*, D. *warren*, to quarrel, wrangle, entangle; Dan. *verre*; G. *verwirren*, to perplex, embroil, disturb. The primary sense of the root is, to strive, struggle, urge, drive, or to turn, to twist.]

1. A contest between nations or states, carried on by force, either for defense, or for revenging insults and redressing wrongs, for the extension of commerce or acquisition of territory, or for obtaining and establishing the superiority and dominion of one over the other. These objects are accomplished by the slaughter or capture of troops, and the capture and destruction of ships, towns, and property. Among rude nations, war is often waged and carried on for plunder. As war is the contest of nations or states, it always implies that such contest is authorized by the monarch or the sovereign power of the nation. When war is commenced by attacking a country in peace, it is called an *offensive* war, and such attack is *aggression*. When war is made only to repel invasion or the attacks of an enemy, it is called *defensive*, and a defensive war is considered as justifiable. Very few of the wars that have desolated nations and deluged the earth with blood, have been justifiable. Happy would it be for mankind, if the prevalence of Christian principles might ultimately extinguish the spirit of *war*, and if the ambition to be great, might yield to the ambition of being good

Preparation for war is sometimes the best security for peace. *Anon.*

2. In *poetical language*, instruments of war.

His complement of arms, and total *war* *Prior*

WA'TER, (wat'er,) *n.* [Sax. *wæter*, *wæs*; D. *water*; G. *wasser*; Dan. *vand*; Sw. *vatten*; Goth. *wato*; Russ. *voda*. This may be from the root of *wet*, Gr. ὑετος, Sans. *udum*. In Ar. *wadi* signifies a stream, or the channel where water flows in winter, but which is dry in summer, a thing common on the plains of Syria and Arabia.]

1 A fluid, the most abundant and most necessary for living beings of any in nature, except air. Water, when pure, is colorless, destitute of taste and smell, nondeterious, transparent, and in a very small degree compressible. It is deposited in the earth in inexhaustible quantities, where it is preserved fresh and cool, and from which it issues in springs, which form streams and rivers. But the great reservoirs of water on the globe are the ocean, seas, and lakes, which cover more than three fifths of its surface, and from which it is raised by evaporation, and uniting with the air in the state of vapor, is wafted over the earth, ready to be precipitated in the form of rain, snow, or hail.

Water, by the abstraction or loss of heat, becomes solid, or, in other words, is converted into ice or snow; and by heat it is converted into steam, an elastic vapor, one of the most powerful agents in nature. Water is a compound of oxygen and hydrogen, two volume or measures of hydrogen gas, and one of oxygen gas. The proportion of the ingredients in weight, is 88·9 parts of oxygen to 11.1 of hydrogen. *Barrelus.*

2 The ocean, a sea, a lake, a river, any great collection of water; as in the phrases, to go by *water*, to travel by *water*.

3 Urine, the animal liquor secreted by the kidneys and discharged from the bladder.

WHAP'PER, (hwop'per,) *n.* Something uncommonly large of the kind. So *thumper* is connected with *thump*, to strike with a heavy blow; applied particularly to a bold lie. [*Vulgar.*]

WHARF, (hworf,) *n.* [Sax. *hwarf*, *hwerf*; D. *werf*, Dan. *verf*; Russ. *berph.* In D. *werven* signifies to raise or levy. In the plural, WHARFS and WHARVES are both used.]

A perpendicular bank or mound of timber or stone and earth, raised on the shore of a harbor, river, canal, &c., or extending some distance into the water, for the convenience of lading and unlading ships and other vessels. The two longest *wharfs* in New England, are at Boston and at New Haven. The latter is much the longest, extending into the harbor about three quarters of a mile.

WHARF, *v. t.* To guard or secure by a wharf or firm wall of timber or stone, as, the western bank of the Connecticut is *wharfed* at Hartford, to prevent the river from wearing away the land.

WHARF'AGE, *n.* The fee or duty paid for the privi-

liege of using a wharf for loading or unloading goods, timber, wood, &c.

WHARFING, *n.* Wharfs in general.

WHARF'IN-GER, *n.* A man who has the care of a wharf, or the proprietor of a wharf.

WHAT, (hwot,) *pronoun relative or substitute.* [Sax. *hwat*, Goth. *waúht*; D. *wat*, G. *was*: Dan. and Sw. *hvad*; Scot. *quhat*; L. *quod, quid.* The Sax. *hwat, hwæt*, signifies brisk, lively, vigorous, which shows that this pronoun is the same word as *wight*, a living being, from the root of the L. *vivo*, for *vigo.* (See WIGHT.) The Gothic *h* represents the Latin *c* in *victus.*]

1. That which. Say *what* you will, is the same as say *that which* you will.

2. Which part. Consider *what* is due to nature, and *what* to art or labor.

3. *What* is the substitute for a sentence or clause of a sentence. "I tell thee *what*, corporal, I could tear her." Here *what* relates to the last clause, "I could tear her;" this is *what* I tell you.

4. *What* is used as an adjective, of both genders, often in specifying sorts or particulars. See *what* colors this silk exhibits. I know *what* qualities you desire in a friend — that is, I know the *qualities which* you desire.

5. *What* is much used in asking questions. *What* sort of character is this? *What* poem is this? *What* man is this we see coming?

6. *What time*, at the time or on the day when.

8. Whatever.

Whether it were the shortness of his foresight, the strength of his will — *what it was.* *Bacon*

9. Some part, or some. "The year before, he had so used the matter, that *what* by force, *what* by policy, he had taken from the Christians above thirty castles;" that is, he had taken above thirty castles, a part or some by force, a part or some by policy, or *what* may be interpreted *partly.* *Knolles*

Sometimes *what* has no verb to govern it, and it must be considered as adverbially used. "*What* with carrying apples and fuel, he had him off in a hurry," that is, partly, in part.

10. *What* is sometimes used elliptically for *what is this?* or *how is this?*

What! no more words? — Mark xiv.

11. *What* is used interrogatively and elliptically, as equivalent to *what will be the consequence? What will follow?* as in the phrase, *what* if I undertake this business myself?

What though: that is, grant this or that; allow it to be so.

What ho; an exclamation of calling.

WHAT, (hwot,) *n.* Fare, things, matter. [*Not in use.*] *Spenser.*

WHAT EV'ER, *pron.* [*what* and *ever.*] Being this or that; being of one nature or another, being one thing or another, any thing that may be. *Whatever* is read, let it be read with attention. *Whatever* measure may be adopted, let it be with due caution. *Whatever* you do, let it be done with prudence.

2. All that, the whole that; all particulars that.

At once came forth *whatever* creeps. *Milton*

WHAT-SO-EV'ER, *a*, compound of *what, so*, and *ever*, has the sense of *whatever*, and is less used than the latter. Indeed, it is nearly obsolete. *Watson*, in a like sense, is entirely obsolete.

WHEAL, *n.* A pustule. [See WEAL.]

WHEAT, (hweet,) *n.* [Sax. *hwæte*; Goth. *hveit*, Ice. *hveiti*; G. *weitzen*; Sw. *hvete*; Dan. *hvede*, D. *weit.* Qu. Heb. חטה, Syr. *id.*]

A plant of the genus Triticum, and the seed of the plant, which furnishes a white flour for bread, and, next to rice, is the grain most generally used by the human race. Of this grain the varieties are numerous, as red wheat, white wheat, bald wheat, bearded wheat, winter wheat, summer wheat, &c.

WHEAT'-BIRD, *n.* A bird that feeds on wheat. *Virginia*

Be blest, if they did know the way
To use their power *when* and how they list. *Davies*

When as, at the time when, what time. [*Obs.*]

When as were Night began to dawn. *Milton.*

WHENCE, *adv.* [Sax. *hwanon.*]

1. From what place.

Whence and what art thou? *Milton*

2. From what source. *Whence* shall we derive hope? *Whence* comes this honor?

Whence hath this woman this wisdom? Matt. xiii.

3. From which premises, principles, or facts. These facts or principles are admitted, *whence* it follows that judgment must be entered for the plaintiff.

4. How, by what way or means. *Mark* xii.

5. *In general*, from which person, cause, place, principle, or circumstance.

From whence may be considered as tautological, *from* being implied in *whence*, but the use is well authorized, and in some cases the use of it seems to give force or beauty to the phrase. We ascended the mountain, *from whence* we took a view of the beautiful plains below.

Of whence is not now used.

WHENCE-SO-EV'ER, *adv.* [*whence, so*, and *ever.*] From what place soever, from what cause or source soever.

Any idea, *whencesoever* we have it. *Locke*

WHENCE-EV'ER See WHENSOEVER.

WHEN-EV'ER *adv.* [*when* and *ever.*] At whatever time. *Whenever* you come, you will be kindly received.

WHEN-SO-EV'ER, *a.* [*when, so*, and *ever.*] At what time soever, at whatever time. *Locke*

WHERE, (hwar,) *adv.* [Sax. *hwar*; Goth. *hwar*, Sw. *hvar*, D. *waar.*]

1. At which place or places.

The maid to go to where he was so happy. *Sidney*
[I will] go where I record my name, I will come to that well where she is. — Ex. xx.

2. At or in what place.

He can not but love virtue, *wherever* it is *Atterbury*

WHERE WITH', *comp* [*where* and *with.*] With which

The love *wherewith* thou hast loved me. — John xvii.

2 With what, *interrogatively.*

Wherewith shall I save Israel? — Judges vi.

WHERE-WITH-AL', *comp.* [See WITHAL.] [*where, with,* and *all*] The same as WHEREWITH.

WHER'RET, *v. t.* [G. *wirren.* Qu]

To hurry, to trouble, to tease, to give box on the ear.

[*Low, and not used in America.*]

WHER'RET, *n.* A box on the ear [*Not in use.*] *Beaum. & Fl.*

WHER'RY, *n* [A different orthography of FERRY, formed with a strong breathing, like *whistle*, from the root of L. *fistula*]

1. A shallow, light boat, built very sharp at both ends, for fast rowing or sailing, especially on the rivers. *Hebert.*

The term has also been applied to some decked vessels used in fishing, in different parts of Great Britain and Ireland. *Mar. Dict.*

2 A liquor made from the pulp of crabs, after the verjuice is expressed; sometimes called CRAB-WHERRY. [*Local.*]

WHET, (hwet,) *v. t.*; *pret.* and *pp.* WHETTED or WHET. [Sax. *hwettan*; Sw *hvässa*; Dan. *hvas*, sharp, *hvæsse*, to whet, D. *wetten*, G. *wetzen.*]

1. To rub for the purpose of sharpening, as an edge-tool, to sharpen by attrition, as, to *whet* a scythe or an ax.

2 To provoke; to excite; to stimulate; as, to *whet* the appetite.

3. To provoke, to make angry or acrimonious.

Since Cæsius first did *whet* me against Cæsar,
I have not slept *Shak*

To whet on, or *whet forward*; to urge on; to instigate. [*Not used, nor proper.*] *Shak.*

WHET, *n.* The act of sharpening by friction.

2. Something that provokes or stimulates the appetite; as, sips, drams, and *whets.* *Spectator.*

WHETH'ER, *pronoun* or *substitute.* [Sax. *hwether.* This word seems to be connected with *what* and the L. *uter*, the latter not being aspirated. The sense seems to be *what*, or *which of two*, referring either to persons or to sentences.]

1. Which of two.

Whether of them twain did the will of his father? — Matt. xxi.

Here, *whether* is a substitute for *one of two*, and signifies *which*; *which* of the two, but in this sense it is obsolete.

2. Which of two alternatives, expressed by a sentence or the clause of a sentence, and followed by *or.* "Resolve *whether* you will go *or* not;" that is, you will go or not go; resolve *which.*

Note. — In the latter use, which is now most common, *whether* is called an adverb. This is a mistake. It is the same part of speech as in the former example. The only difference is, that in the former example it represents or refers to a noun, and in the latter to a sentence or clause.

WHETH'ERING, *n.* The retention of the after birth in cows. *Gardner.*

WHET'STONE, *n.* [*whet* and *stone.*] A stone used for sharpening edged instruments by friction

WHET'STONE-SLATE, } *n.* Novaculite, a variety
WHET'-SLATE, } of slate used for sharpening instruments of iron. The light-green colored variety from the Levant is the most valuable, and is called HONESTONE. It should be kept in a damp place, that it may not become too dry and hard.

WHET'TED, *pp.* Rubbed for sharpening, sharpened, provoked; stimulated.

WHET'TER, *n.* He or that which whets or sharpens.

WHET'TING, *ppr.* Rubbing for the purpose of making sharp, sharpening, provoking, inciting, stimulating.

WHEW'ER, *n.* Another name of the widgeon. [*Local.*]

WHEY, (hwa,) *n* [Sax. *hwæg*, D. *wei* or *hui.*]

The serum or watery part of milk, separated from the more thick or coagulable part, particularly in the process of making cheese. In this process, the thick part is called *curd*, and the thin part *whey.*

WHEY'EY, (hwā'e,) *a.* Partaking of whey, resembling whey. *Bacon.*

WHEY'ISH, *a* Having the qualities of whey. *Philips.*

WHEY'-TUB, *n.* A tub in which whey stands for yielding cream, &c. *Cyc.*

WHICH, *pron.* [If this is from the Saxon *hwile* or *hwulc*, it is from the Gothic *hwileiks*, which coincides with the Latin *qualis*; D. *welk*, G. *welche*, *welcher*, Dan. *hvilken*, *hvilket*, Sw. *hvilken.* This is the probable origin of the word, and its true sense is that of the Latin *qui*, *qualis*, *quicunque.* In these senses it occurs in all Saxon books Its proper use was as a pronoun of interrogation, "Hwylc man is of eow?" what man is there of you? *Matt.* vii. 9. "Hwylc is min modor?" who is my mother? *Mark* iii. 33. Its use for *who*, Saxon *hwa*, as in the Lord's prayer, "Our Father *which* art in heaven," is an improper application of the word. In its original sense it is used for all genders, as, *which* man, *which* woman, *which* thing? As an interrogative we still use it in this manner. Its use for *who* was of long continuance, but is happily discontinued, and our present practice accords with its original use in the Saxon.]

1. A pronoun or word of interrogation in all genders, as, *which* man is it? *which* woman was it? *which* is the house?

2. In reference to *things*, or in the neuter gender, it is a relative referring to something before mentioned; as, "God rested on the seventh day from all his work *which* he had made." *Gen.* ii. 2. In some phrases, the relative may precede the noun to which it refers.

3. *Which*, like other pronouns, may be used as a substitute for another word or for a sentence. "We are bound to obey all the divine commands, which we can not do without divine aid." Here *which* is a substitute for *obey all the divine commands.* The man was said to be *innocent*, *which* he was not. Here *which* is a substitute for *innocent.*

4. That which; those which; as, take *which* you will.

The which, by the which, &c., are obsolete.

WHICH-EV'ER, } *pron.* Whether one or the oth-
WHICH-SO-EV'ER, } er. *Whichever* road you take, it will conduct you to town

WHIFF, *n.* [W. *gwyf*, a whiff or puff, a hiss; *gwiffiaw*, to whiff, and *gwaf*, a quick gust.]

1. A sudden expulsion of air from the mouth; a puff, as, the *whiff* of a smoker.

And seasons his *whiffs* with impertinent jokes. *Pope.*

2. In *ichthyology*, a flat-fish of the turbot group, Rhombus megastoma. *Jardine's Nat. Lib.*

WHIFF, *v. t.* To puff; to throw out in whiffs; to consume in whiffs.

WHIF'FLE, (whif'fl,) *v. i.* [D. *weifelen*, to waver; *waeven*, to hover. This accords in sense with G *zweifeln*, to doubt, which would seem to be from *zwei*, two, or its root. The G. has also *schweifen*, to rove or wander, which seems to be allied to *sweep.* The D. has also *twyffelen*, to doubt, from *twee*, two, or its root; Sw. *tvifla*, Dan. *tvivler*, from the root of *two.* Yet *whiffle* seems to be directly from *whiff.*]

To start, shift, and turn; to change from one opinion or course to another; to use evasions; to prevaricate; to be fickle and unsteady.

A person of *whiffling* and unsteady turn of mind, can not keep close to a point of a controversy. *Watts.*

WHIF'FLE, *v. t.* To disperse with a puff, to scatter *Marc.*

WHIF'FLE, *n.* *Anciently*, a fife or small flute.

WHIF'FLE-TREE, } *n.* The bar to which the traces
WHIP'PLE-TREE, } of a carriage are fastened for draught.

WHIF'FLER, *n.* One who whiffles or frequently changes his opinion or course, one who uses shifts and evasions in argument.

2. A harbinger; an officer who went before processions to clear the way by blowing the horn or trumpet. *Toone. Shak*

3. A young man who goes before a company in London on occasions of public solemnity. *Cyc.*

WHIG, (hwig,) *n.* [Sax. *hwæg* See WHEY]

Acidulated whey, sometimes mixed with butter milk and sweet herbs, used as a cooling beverage [*Local.*]

WHIG, *n.* [Ash, in his Dictionary, informs us that this word is from *whiggam*, a term used in Scotland in driving horses, *whiggamor*, one who drives horses. In 1648, a party of these people marched to Edinburgh to oppose the king and the duke of Hamilton, and hence the name of *whig* was given to the party opposed to the court.]

One of a political party which had its origin in England in the seventeenth century, in the reign of Charles I. or II., when great contests existed respecting the royal prerogatives and the rights of the people. Those who supported the king in his high claims were called *tories*, and the advocates of popular rights were called *whigs.* During the revolution in the United States, the friends and supporters of the war and the principles of the revolution were called *whigs*, and those who opposed them were called *tories* and *royalists.*

Where, then, when torn a scarce get clear,
Shall *whigs* and congresses appear? *M'Fingal*

WHIG, *a* Pertaining to or composed of whigs.

WHIG'GAR CHY, *n.* Government by whigs. [*Cant.*] *Swift.*

WHIG'GER-Y, *n.* The principles of a whig.

WHIG'GISH, *a.* Pertaining to whigs; partaking of the principles of whigs *Swift.*

WHIG'GISM, *n.* The principles of a whig. *Swift.*

WHILE, (hwile,) *n.* [Sax. *hwile*, Goth. *hweila*; G. *weil*; D. *wyl*, time, while, Dan. *hvile*, Sw. *hvila*, repose; W. *gwyl*, a turn, Ir. *foil.* See the verb.]

Time; space of time, or continued duration. He was some *while* in this country. One *while* we thought him innocent.

Worth while; worth the time which it requires; worth the time and pains; hence, worth the expense. It is not always *worth while* for a man to prosecute for small debts.

WHILE, *adv.* During the time that. *While* I write,
2. As long as. [you sleep.

1 That faculty of the mind by which we determine either to do or forbear an action, the faculty which is exercised in deciding, among two or more objects, which we shall embrace or pursue The will is directed or influenced by the judgment. The understanding or reason compares different objects, which operate as motives; the judgment determines which is preferable, and the *will* decides which to pursue. In other words, we *reason* with respect to the value or importance of things, we then *judge* which is to be preferred, and we *will* to take the most valuable. These are but different operations of the mind, soul, or intellectual part of man. Great disputes have existed respecting the freedom of the *will*

[*Will* is often quite a different thing from *desire*]

A power over a man's subsistence amounts to a power over his *will*. *Federalist, Hamilton*

WIS, *v. t.*; *pret.* WIST. [G. *wissen*, D. *weeten*, Dan. *vider*; Sw. *veta.* This is the Sax. *witan*, to *wit.*]

To think, to suppose; to imagine [*Obs.*] *Spenser.*

WIS'DOM, (wiz'dum,) *n.* [Sax. *id.*; *wise* and *dom*; G. *weisheit*, (*wiseheit*,) D. *wysheid*, Sw. *visdom* and *vishet*; Dan. *visdom* or *visdom.* (See WISE.) *Wisdom*, it seems, is from the Gothic dialect.]

1. The right use or exercise of knowledge, the choice of laudable ends, and of the best means to accomplish them. This is wisdom in *act*, *effect*, or *practice*. If wisdom is to be considered as a *faculty* of the mind, it is the faculty of discerning or judging what is most just, proper, and useful; and if it is to be considered as an *acquirement*, it is the knowledge and use of what is best, most just, most proper, most conducive to prosperity or happiness. Wisdom in the first sense, or *practical wisdom*, is nearly synonymous with DISCRETION. It differs somewhat from PRUDENCE in this respect. *prudence* is the exercise of sound judgment in avoiding evils; *wisdom* is the exercise of sound judgment either in avoiding evils or attempting good. *Prudence*, then, is a species, of which *wisdom* is the genus

Wisdom gained by experience is of inestimable value. *Scott*
It is hoped that our rulers will act with dignity and *wisdom*; that they will yield every thing to reason, and refuse every thing to force. *Ames*

2. In *Scripture*, human learning; erudition, knowledge of arts and sciences.

Moses was learned in all the *wisdom* of the Egyptians — Acts vii.

3. Quickness of intellect; readiness of apprehension; dexterity in execution; as, the *wisdom* of Bezaleel and Aholiab. *Exod.* xxxi.

4. Natural instinct and sagacity. *Job* xxxix.

5. In *Scripture theology*, wisdom is true religion; godliness, piety; the knowledge and fear of God, and sincere and uniform obedience to his commands. This is the *wisdom* which is from above. *Ps.* xc. *Job* xxviii.

6. Profitable words or doctrines. *Ps.* xxxvii.

The wisdom of this world, mere human erudition; or the carnal policy of men, their craft and artifices in promoting their temporal interests, called also *fleshly wisdom.* 1 *Cor.* ii. 2 *Cor.* i.

The wisdom of words; artificial or affected eloquence; or learning displayed in teaching. 1 *Cor.* i. ii.

WISE, *a.* [Sax. *wis*, *wise*; G. *weise*; D. *wys*; Sw. *vis*, Dan. *viis*; Sax. *wisean*, G. *wissen*, to know; Sans. *vid* This, in Dutch, is *weeten*, to know, which is the Goth. *witan*, Sax. *witan*, Eng. to *wit*, perhaps Gr. ἰδεῖν. So that *wise*, *wit*, *weet*, *wot*, are all from one root, or dialectical forms of the same word; Ir. *fois*, *foas*, knowledge, W. *gwys*, *gwyz*, Sans *vidya*, intelligence. In general, the radical sense of *know* is to reach or to hold, from extension, stretching. In this case, it may be to show, to disclose, from a like sense; for in Sw. *visa*, Dan. *viser*, G. *weisen*, D. *wysen*, is to show. In this case, L. *video*, *visum*, which seems to be connected with this word, may coincide in origin with *wide*. *Wistful*, attentive, eager, is from reaching forward.]

1. *Properly*, having knowledge; hence, having the power of discerning and judging correctly, or of discriminating between what is true and what is false; between what is fit and proper and what is improper; as, a *wise* prince; a *wise* magistrate. Solomon was deemed the *wisest* man. But a man may be *speculatively* and not *practically* wise. Hence,

2. Discreet and judicious in the use or application of knowledge; choosing laudable ends, and the best means to accomplish them. This is to be *practically* wise. *Gen.* xli.

3. Skillful; dextrous.

They are *wise* to do evil, but to do good they have no knowledge — Jer. iv.

4. Learned; knowing; as, the *wise* and the unwise. *Rom.* i.

5. Skilled in arts, science, philosophy, or in magic and divination. 2 *Sam.* xiv.

6. Godly; pious. *Prov.* xiii.

The Holy Scriptures, which are able to make thee *wise* to salvation. — 2 Tim. iii.

7. Skilled in hidden arts; *a sense somewhat ironical*; as, the *wise* woman of Brainford. *Shak.*

8. Dictated or guided by wisdom; containing wisdom, judicious, well adapted to produce good effects, *applicable to things*; as, a *wise* saying; a *wise* scheme or plan; *wise* conduct or management, a *wise* determination.

9. Becoming a wise man, grave; discreet, as, *wise* deportment. *Milton.*

WISE, *n.* [Sax. *wise*, G. *weise*, D. *wys*, Sw. *vis*, Dan. *vis*, Fr. *guise*; It. *guisa*; Arm. *guis.*]

Manner, way of being or acting.

Thus sung she sings in most commanding *wise*. *Sidney*
In fittest *wise*. *Spenser*

In the foregoing form this word is obsolete. The use of it is now very limited. It is common in the following phrases

1. *In any wise.*

If he that sanctified the field will in any *wise* redeem it. — Lev xxvii.
Feet not thyself in any *wise*. — Ps. xxxvii.

2. *On this wise.*

On this *wise* ye shall bless the children of Israel. — Num. vi

3. *In no wise.*

He shall in no *wise* lose his reward. — Matt. x

It is used in composition, as in *likewise*, *otherwise*, *longthwise*, &c. By mistake, *ways* is often used for it, as, *lengthways* for *lengthwise.*

WISE'A-CRE, (wīz'a-ker,) *n.* [G. *weise*, wise, and *sagen*, to say, G. *weissager*, a foreteller. The proper English word would be WISE-SAYER.]

WISE'NESS, *n.* Wisdom. [*Obs.*] *Spenser.*

WISE'-SAY-ER, *n.* [G. *weise*, wise, and *sagen*, to say, to tell, *weissager*, a foreteller.]

1. A foreteller, one who is noted for predicting the weather

2. One who makes pretensions to great wisdom, hence, in *contempt*, a simpleton, a dunce.

WISH, *v. t.* [Sax. *wiscan*, Cimbric, *oska*. In all the other Teutonic and Gothic dialects, the corresponding word is written with *n*, D. *wenschen*; G. *wünschen*, Dan. *ønsker*, Sw. *önska*. This is probably the same word.]

1. To have a desire, or strong desire, either for what is or is not supposed to be obtainable. It usually expresses less than LONG, but sometimes it denotes to long or wish earnestly. We often *wish* for what is not obtainable

This is as good an argument as an antiquary could *wish* for. *Arbuthnot.*
They have more than heart could *wish*. — Ps. lxxiii.
I *wish* above all things that thou mayest prosper. — 3 John 2.
They cast four anchors out of the stern, and *wished* for the day — Acts xxvii.

2. To be disposed or inclined, as, to *wish* well to another's affairs. *Addison.*

3. It sometimes partakes of hope or fear. I *wish* the event may prove fortunate, or less calamitous than we apprehend.

WISH, *v. t.* To desire. I *wish* your prosperity.

Let them be driven backward, and put to shame, that *wish* me evil. — Ps. xl.

2. To long for; to desire eagerly or ardently. It has this sense when expressed with emphasis.

3. To recommend by wishing.

I would not *wish* them to a fairer death. *Shak.*

4. To imprecate, as, to *wish* curses on an enemy. *Shak.*

5. To ask; to express desire. *Clarendon.*

WISH, *n.* Desire; sometimes eager desire. *Job* xxxiii.

2. Desire expressed. *Pope.*

Blistered be thy tongue
For such a *wish*. *Shak.*

3. Thing desired. He has his *wish.*

The difference between *wish* and *desire* seems to be, that *desire* is directed to what is obtainable, and a *wish* may be directed to what is obtainable or not. *Kames.*

14. Upon

Such arguments had invincible force *with* those pagan philosophers *Addison*

15. In consent, noting parity of state.

Sea! where on earth the flow'ry glories lie,
Wait'st for the ill-married, and *with* her envy die *Pope*

With and *by* are closely allied in many of their uses, and it is not easy to lay down a rule by which their uses may be distinguished. It is observed by Johnson that *with* seems rather to denote an instrument, and *by* a cause, as, he killed an enemy *with* a sword, but he died *by* an arrow. But this rule is not always observed.

With, in *composition*, signifies sometimes opposition, privation, or separation, departure.

WITH-AL', (with-awl') *adv.* [*with* and *all*.] With the rest, together with, likewise, at the same time.

If you choose that, then I am yours *withal* *Shak.*

Without the separation of the two monarchies, the most advantageous terms from the French must end in their destruction *Addison.*

6. Independent of, not by the use of. Men like to live *without* labor

Wise men will do it *without* a law. *Bacon.*

7. On the outside of; as, *without* the gate, *without* doors.

8. With exemption from. That event can not happen *without* great damage to our interests.

9. Unless; except.

Without, when it precedes a sentence or member of a sentence, has been called a conjunction. This is a mistake. "You will not enjoy health, *without* you use much exercise." In this sentence, *without* is a preposition still, but followed by a member of a sentence, instead of a single noun. It has no property of a connective or conjunction, and does not fall within the definition. You will not enjoy health, this fact following being removed, or not taking place, *you use exercise*. This use of *without* is nearly superseded by *unless* and *except*, among good writers and speakers, but is common in popular discourse or parlance.

WITH'OUT', *adv.* Not on the inside; not within.

Thieves were from *without* the growing miseries *Milton.*

WON'DER, (wun'der,) *n.* [Sax. *wunder*; G. *wunder*, D. *wonder*, Sw. and Dan. *under*, qu. Gr. *θαυμα*, to show, and hence a sight, or from the root of Sp *espanto*, a panic.]

1. That emotion which is excited by novelty, or the presentation to the sight or mind of something new, unusual, strange, great, extraordinary, or not well understood, something that arrests the attention by its novelty, grandeur, or inexplicableness. *Wonder* expresses less than *astonishment*, and much less than *amazement.* It differs from *admiration* in not being necessarily accompanied with love, esteem, or approbation, nor directed to persons. But *wonder* sometimes is nearly allied to *astonishment*, and the exact extent of the meaning of such words can hardly be graduated.

They were filled with *wonder* and amazement. — Acts iii

Wonder is the effect of novelty upon ignorance. *Johnson.*

2. Cause of wonder, that which excites surprise, a strange thing, a prodigy.

To try things oft, and never to give over, doth *wonders.* *Bacon*

WORM, (wurm,) *n.* [Sax. *wyrm*; G. *wurm*; D. *worm*; Dan. *orm*, Sw. *ul*, a serpent. This word is probably named from a winding motion, and the root of *swarm*.]

1. In *common usage*, any small, creeping animal, or reptile, either entirely without feet, or with very short ones, including a great variety of animals of different classes and orders, viz., certain small serpents, as the blind-worm or slow-worm; the larvas of insects, viz., grubs, caterpillars, and maggots, as the wood-worm, canker-worm, silk worm, (the larva of a moth, (*Phalæna*,) which spins the filaments of which silk is made,) the grub that injures corn, grass, &c., the worms that breed in putrid flesh, the bots in the stomach of horses, and many others; certain wingless insects, as the glow-worm; the intestinal worms, or such as breed in the cavities and organs of living animals, as the tape-worm, the round-worm, the fluke, &c.; and numerous animals found in the earth, and in water, particularly in the sea, as the earth-worm or *lumbricus*, the hair-worm or *gordius*, the *teredo*, or worm that bores into the bottom of ships, &c. *Worms*, in the plural, in common usage, is used for intestinal worms, or those which breed in the stomach and bowels, particularly the round and thread worms, (*ascarides* and *oxyurides*,) which are often found there in great numbers; as we say, a child has *worms*.

2. In *zoology*, the term *Vermes* or *worms* has been applied to different divisions of invertebral animals, by different naturalists. Linnæus's class of *Vermes* includes the following orders, viz., *Intestina*, including the proper intestinal worms, the earth worm, the hair worm, the *teredo*, and some other marine worms; *Mollusca*, including the slug, and numerous soft animals inhabiting the water, particularly the sea; *Testacea*, including all the proper shell fish; *Zoophyta*, or compound animals, including corals, polypes, and sponges; and *Infusoria*, or simple microscopic animalcules. His character of the class is, spiracles obscure, jaws various, organs of sense usually tentacula, no brain, ears, nor nostrils, limbs wanting, frequently hermaphrodite. This class includes all the invertebral animals, except the insects and *crustacea*. The term *Vermes* has been since greatly limited, particularly by the French naturalists. Lamarck confined it to the intestinal worms, and some others, whose organization is equally simple. The character of his class is, suboviparous, body soft, highly reproductive, undergo no metamorphosis, no eyes, not articulated limbs, nor radiated disposition of internal organs *Lamarck. Cyc.*

WOT, *v. t.* [Originally WIT, the preterit of Sax. *witan*, to know, formerly used also in the present tense.]

To know, to be aware. [*Obs.*] *Spenser.*

WOULD, (wood,) *pret.* of WILL. [G. *wollen*, L. *volo*.]

Would is used as an auxiliary verb in conditional forms of speech. "I *would* go if I could." This form of expression denotes *will* or *resolution*, under a condition or supposition.

You *would* go, } denote simply an event under a
He *would* go, } condition or supposition.

The condition implied in *would* is not always expressed. "By pleasure and pain I *would* be understood to mean what delights or molests us;" that is, *if it should be asked* what I mean by pleasure and pain, I *would* thus explain what I wish to have understood. In this form of expression, which is very common, there seems to be an implied allusion to an inquiry, or to the supposition of something not expressed.

Would has the sense of *wish* or *pray*, particularly in the phrases "*would* to God," "*would* God we had died in Egypt," "I *would* that you knew what conflict I have," that is, I *could* wish such a thing, *if* the wish could avail. Here also there is an implied condition.

Would is used also for *wish to do*, or *to have*. What *wouldst* thou? What *would* he?

WOULD'ING, (wood'ding,) *n.* Motion of desire. [*Not in use.*] *Hammond.*

WOUND, (wound *or* woond,) *n.* [Sax. *wund*; D. *wond*, G. *wunde*; W. *gwaun*, to thrust, to stab.]

1. A breach of the skin and flesh of an animal, or of the bark and wood of a tree, or of the bark and substance of other plants, caused by violence or external force. The self-healing power of living beings, animal or vegetable, by which the parts separated in *wounds* tend to unite and become sound, is a remarkable proof of divine benevolence and wisdom.

2. Injury; hurt; as, a *wound* given to credit or reputation.

[Walker condemns the pronunciation *woond* as a "capricious novelty." It is certainly opposed to an important principle of our language, viz., that words in *ou*, of Saxon origin, retain the regular Saxon sound of *ou*, as *sound*, *ground*, *found*, &c., while words derived from the French have the sound of *ou* in that language, as *soup*, *group*, &c. It is very undesirable to break in upon this rule, though *woond* is undoubtedly the fashionable pronunciation. — *Ed.*]

WOUND, (woond *or* woond,) *v. t.* To hurt by violence; as, to *wound* the head or the arm; to *wound* a tree.

He was *wounded* for our transgressions. — Is. liii.

X.

X, THE twenty-fourth letter of the English alphabet, is borrowed from the Greek. In the middle and at the end of words, it has the sound of *ks*, as in *wax, lax, luxury*. At the beginning of a word, it has precisely the sound of *z*. It is used as an initial in a few words borrowed from the Greek.

As *a numeral*, X stands for 10. It represents one V, which stands for 5, placed on the top of another. When laid horizontally, thus, ⋈, it stands for 1000; and with a dash over it, thus, $\bar{X}$, it stands for 10,000. As *an abbreviation*, X. stands for *Christ*, as in Xn. *Christian*, Xm. *Christmas*.

A surgeon's instrument for scraping bones.

Y.

Y, THE twenty-fifth letter of the English alphabet, is taken from the Greek υ. At the beginning of words, it is called an articulation or consonant, and with some propriety, perhaps, as it brings the root of the tongue in close contact with the lower part of the palate, and nearly in the position to which the close *g* brings it. Hence it has happened that in a great number of words, *g* has been changed into *y*, as the Sax. *gear* into *year*, *geornian* into *yearn*, *gyllan* into *yell*, *geolew* into *yellow*.

In the middle and at the end of words, *y* is precisely the same as *i*. It is sounded as *i* long, when accented, as in *defy, rely*; and as *i* short, when unaccented, as in *vanity, glory, synonymous*. This latter sound is a vowel. At the beginning of words, *y* answers to the German and Dutch *j*.

Y, as *a numeral*, stands for 150, and with a dash over it, $\bar{Y}$, for 150,000.

YACHT, (yot,) *n.* [D. *jagt*, G. *jacht*, from *jagen*. It is originally a boat drawn by horses.]

YOLK, *n.* The yelk of an egg. [See YELK.]

2. The unctuous secretion from the skin of sheep, consisting of a peculiar potash soap, which renders the pile soft and pliable. *Ure.*

3. The *nucellus*, a part of the seed of plants, so named by Gærtner, from its supposed analogy to the yelk of an egg. It is characterized as very firmly and inseparably connected with the embryo, yet never rising out of the integuments of the seed in germination, but absorbed, like the *albumen*, (see WHITE and PERISPERM,) for the nourishment of the embryo. When the albumen is present, it is always situated between it and the embryo. In the grasses it forms a scale between the embryo and albumen. It is considered by Smith as a subterranean cotyledon. *Cyc. Smith.*

YON, } *a.* [Sax. *geond.* This seems to be formed
YOND, } from *gan*, to go, or its root, and signifies properly *gone*, or it is from *geonan*,
YON'DER, } to open; whence distant. The G. *jener*, and D. *gene, ginder*, may be the same word, or from the same root.]

Being at a distance within view.

Yonder men are too many for an embassy. *Bacon.*
Read thy lot in *yon* celestial sign. *Milton.*
Yon flowery arbors, *yonder* alleys green. *Milton.*

YON, } *adv.* At a distance within view. When
YOND, } we use this word, we often point the
YON'DER, } hand or direct the eye to the place or object.

First and chiefest, with thee bring
Him that *yon* soars on golden wing
Yonder are two apple-women scolding. *Milton. As but not.*

But Satan now is wiser than *of yore*. *Pope.*

YOU, (yu,) *pron.* [Sax. *eow, iu, uuk*; G. *euch*; Arm. *chuy*, D. *gij* or *uw*, thou. *You* has been considered as in the plural only, and is so treated in the Saxon grammar. But from the Belgic dialect, it appears to be in the singular as well as the plural, and our universal popular usage, in applying it to a single person with a verb in the singular number, is correct. *Yourself* is in the singular number.]

1. The pronoun of the second person, in the nominative or objective case. In familiar language, it is applied to an individual, as *thou* is in the solemn style. In the plural, it is used in the solemn style in the objective case.

In vain you tell your parting lover,
You wish for what you may with from over. *Prior.*
He that despiseth you, despiseth me.—Luke x.

2. *You* is used, like *on* in French, for any one. This at a distance looks like a rock, but as *you* approach it, *you* see a little cabin.

YOUNG, (yung,) *a.* [Sax. *iong, geong*; G. *jung*, D. *jong*, Sw. and Dan. *ung*; Arm. *yaonncq*, W. *ieuanc*, Sans. *yuvuna*, L. *juvenis.* Qu. Ch. Syr. Heb. and Sam. עז, to suck, or Goth. *uuggs*, young. The Welsh makes the word a compound, and the origin is not evident.]

1. Not having been long born, being in the first part of life, not old, as, a *young* animal, a *young* man, a *young* child, a *young* man, a *young* fawn.

2. Being in the first part of growth, as, a *young* plant, a *young* tree.

1. Belonging to you, *equally applicable to both numbers*, as, *your* father, *your* heart, *your* prince, *your* subjects.

2. It is used indefinitely.

Your intellect and *your* critic are much nearer related than the world imagine. *Addison.*

3. *Yours* is used as a substitute for a noun in the nominative or objective. This book is *yours*. I have no pen, give me *yours*. My sword and *yours* are keen. *Shak.*

YOUR SELF', *pron., pl.* YOURSELVES. [*your* and *self.*]

A word added to *you*, to express distinction emphatically between you and other persons. The work you must do *yourself*; or you *yourself* must do it, that is, *you* and no other person.

Sometimes it is used without *you*.

Allow obedience, if *yourselves* are old. *Shak.*

It is used as the reciprocal pronoun. You love only *yourself*; you have brought this calamity on *yourselves*, be but *yourselves.*

YOUTH, (yuth,) *n.* [Sax. *geogoth, iugoth, geogath*; Goth. *yuggs*, G. *jugend*, D. *jeugd.*]

1. The part of life that succeeds to childhood. In *a general sense*, *youth* denotes the whole early part of life, from infancy to manhood, but it is not unusual to divide the stages of life into *infancy, childhood, youth*, and *manhood*. In this sense, the word can have no plural.

Those who pass their *youth* in vice, are justly condemned to spend their age in folly. *Rambler.*

2. A young man. In this sense, it has a plural.

Seven *youths* from Athens yearly send. *Dryden.*

2. The theocracy, or church of God. *Kitto.*

ZIR'CON, *n.* A mineral containing the earth zirconia and silica, occurring in square prisms with pyramidal terminations of a brown or gray color, occasionally red, and often nearly transparent. *Hyacinth* is the red variety. *Dana*

ZIR CO'NI-A, *n.* An oxyd of the metal *zirconium*, discovered by Klaproth, in the year 1789, in the *zircon* of Ceylon, and subsequently in the hyacinth of Expaily in France. It resembles *alumina* in appearance. It is so hard as to scratch glass. When pure, it is a white powder.

ZIR'CO NITE, *n.* A variety of the ZIRCON

ZIR-CO'NI-UM, *n.* The metallic basis of zirconia. Berzelius first obtained *zirconium* in 1824, but Davy had previously rendered its existence quite probable. It is commonly obtained in the form of a black powder. Its metallic character is questioned by some

ZIZ'EL, *n.* A rodent mammal, the Arctomys Citillus It is found in Russia and Germany, and also in Asia. It is the SUSLIK, often called the EARLESS MARMOT It is a small quadruped.

ZOC'CO,
ZO'CLE,
ZOC'CO-LO, } *n.* [It. *zoccolo*, from L. *soccus*, a sock.]

A socle, which see.

ZO'DI AC, *n.* [Fr. *zodiaque*: It. and Sp. *zodiaco*, L. *zodiacus*, Gr. ζῳδιακος, from ζῳον, an animal.]

1. A broad circle in the heavens, containing the twelve signs through which the sun passes in its annual course. The center of this belt is the ecliptic, which is the path of the sun. It intersects the equator at an angle of about twenty-three degrees and twenty-eight minutes. This is called its *obliquity.*

2. A girdle. *Milton.*

ZO-DI'AC-AL, *a.* Pertaining to the zodiac.

Zodiacal light; a luminous track, of an elongated, triangular figure, lying nearly in the ecliptic, its base being on the horizon, and its apex at varying altitudes. In the evening, after twilight, it is in this latitude most conspicuous from January to April, and in the morning, before dawn, from September to December. Its nature is unknown. *E. C Herrick.*

ZO'HAR, *n.* [Heb.] A Jewish book of cabalistic commentaries on Scripture. *Brande.*

ZOIS'ITE, *n.* [from Van *Zois*, its discoverer.]

A grayish variety of Epidote. *Dana.*

ZŌNE, *n.* [L. *zona*, Gr. ζωνη.]

1. A girdle.

An embroidered *zone* surrounds her waist. *Dryden.*

2. In *geography*, a division of the earth, with respect to the temperature of different latitudes. The zones are five, the torrid zone, extending from tropic to tropic 46° 56′, or 23° 28′, on each side of the equator; two temperate or variable zones, situated between the tropics and polar circles, and two frigid zones, situated between the polar circles and the poles.

3. In *natural history*, a band or stripe running round any object. *Gardner.*

4. Circuit, circumference. *Milton.*

Ciliary zone, in *anatomy*, the black impression of the ciliary processes on the vitreous humor of the eye. *Cyc.*

ZŌN'ED, *a.* Wearing a zone *Pope.*

2. Having zones or concentric bands.

ZŌNE'LESS, *a.* Not having a zone.

ZON'NAR, *n.* A belt or girdle, which the Christians and Jews in the Levant are obliged to wear, to distinguish them from the Mohammedans. *Cyc.*

ZO-OG'RA PHER, *n.* [See ZOŌGRAPHY.] One who describes animals, their forms, and habits.

ZO-O-GRAPH'IC-AL, *a.* Pertaining to the description of animals.

ZO-OG'RA-PHY, *n.* [Gr. ζωον, an animal, and γραφω, to describe.]

A description of animals, their forms, and habits. [But Zoography is generally used.]

ZO-OL'A-TRY, *n.* [Gr. ζωον and λατρεια.]

The worship of animals

ZŌ'O-LITE, *n.* [Gr. ζῳον, an animal, and λιθος, stone.]

An animal substance petrified or fossil [Not in use.] *Morin.*

ZO-O-LOG'IC AL, *a.* [from *zoology.*] Pertaining to zoology, or the science of animals.

ZO-O LOG'IC-AL LY, *adv.* According to the principles of zoology. *Lawrence.*

ZO OL'O GIST, *n.* [from *zoology.*] One who is well versed in the natural history of animals, or who describes animals.

ZO OL'O-GY, *n.* [Gr. ζωον, an animal, and λογος, discourse.]

That part of natural history which treats of the structure, habits, classification, and habitations of all animals, from man to the lowest of all the tribes.

ZO-ON'IC, *a* [Gr. ζωον, an animal.]

Pertaining to animals, obtained from animal substances.

ZO-ON'O-MY, *n.* [Gr. ζωον, an animal, and νομος, law.]

The laws of animal life, or the science which treats of the phenomena of animal life, their causes and relations *Darwin*

ZO-OPH'A-GAN, *n.* [Gr ζωον, an animal, and φαγω, to eat.]

An animal that feeds on animal food, a carnivorous quadruped

ZO-OPH'A GOUS, (*zo of'a gus,*) *a* [Gr. ζωον, an animal, and φαγω, to eat.]

Feeding on animals *Kirby.*

ZŌ'O PHYTE See ZOOPHYTE.

ZO O PHOR'IC, *a.* [Gr. ζωον, an animal, and φορεω, to bear.]

The zoophoric column is one which supports the figure of an animal.

ZO OPH'O RUS, *n* [Supra.] In *ancient architecture*, the same with the FRIEZE in modern architecture, a part between the architrave and cornice, so called from the figures of animals carved upon it. *Dict.*

ZŌ'O-PHYTE, *n.* [Gr. ζωον, an animal and φυτον, a plant.]

A general term, applied to simple polyps, and compound individuals consisting of many polyps united together, as in most corals. They often branch like vegetation, and the polyps resemble flowers in form The term formerly included sponges and corallines, in addition to the above. *Dana*

ZO O PHYT'IC, *a* Pertaining to zoophytes.

ZO-O-PHY-TO LOG'IC-AL, *a.* Pertaining to zoophytology.

ZO O PHY-TOL'O-GY, *n.* [*zophyte*, and Gr. λογος, discourse.]

The natural history of zoophytes. *Ed. Encyc.*

ZO-O TOM'IC AL, *a.* Pertaining to zootomy.

ZO-OT'O MIST, *n.* [See ZOOTOMY.] One who dissects the bodies of animals, a comparative anatomist

ZO-OT'O-MY, *n.* [Gr. ζωον, an animal, and τεμνω, to cut.]

The anatomy of all animals, the dissection of all animals for the purpose of discovering their structure, the functions of their several parts, &c. *Zoötomy* is divided into *anthropotomy*, or the anatomy of man; *ornithotomy*, or the anatomy of birds; *ichthyotomy*, or the anatomy of fishes, &c. The anatomy of brute animals, and more especially quadrupeds, is called COMPARATIVE ANATOMY.

ZOR'IL, *n.* A fetid animal, a mere variety of the Memphitis Americana, or skunk, found in South America [In Sp. *zorro* is a *fox*, and *zorillo* the whelp of a fox.] *Cyc.*

ZOUNDS, *n.* An exclamation contracted from "God's wounds;" formerly used as an oath, and an expression of anger or wonder. *Smart.*

ZUF'FO-LO, *n.* [It. *zufolo*, from *zufolare*, to hiss or whistle, L. *sufflo.*]

A little flute or flageolet, especially that which is used to teach birds *Busby.*

ZŪ'MATE See ZYMATE.

ZŪ'MIC. See ZYMIC ACID.

ZU MO-LOG'IC AL, *a.* [See ZUMOLOGY.] Pertaining to zumology.

[This word should be written ZYMOLOGICAL.]

ZU-MOL'O-GIST, *n* One who is skilled in the fermentation of liquors.

[This word should be written ZYMOLOGIST.]

ZU-MOL'O-GY, *n.* [Gr. ζυμη, ferment, from ζυμοω, to ferment, and λογος, discourse.]

A treatise on the fermentation of liquors, or the doctrine of fermentation. *Cyc.*

[This word should be written ZYMOLOGY.]

ZU MOM'E-TER, } *n.* [Gr. ζυμωσις, fermenta-
ZU-MO SIM'E TER, } tion, or ζυμη, ferment, and μετρεω, to measure.]

An instrument proposed by Swammerdam for ascertaining the degree of fermentation occasioned by the mixture of different liquids, and the degree of heat which they acquire in fermentation. *Cyc*

[These should be written ZYMOSIMETER and ZYMOMETER.]

ZUR'LITE, *n* A newly-discovered Vesuvian mineral, whose primitive form is a cube, or, according to some authors, a rectangular prism.

Journ. of Science.

ZYG O-DAC'TYL'IC, } *a.* [Gr ζυγοω, to join, and
ZYG O-DAC'TYL OUS, } δακτυλος, a finger.]

Having the toes disposed in pairs, distinguishing an order of birds which have the feet furnished with two toes before and two behind, as the parrot, woodpecker, &c *Partington. Ed Encyc.*

ZYG O MAT'IC, *a.* [Gr. ζυγωμα, a joining.]

Pertaining to a bone of the head, called also *os jugale*, or cheek bone, or to the bony arch under which the temporal muscle passes. The term *zygoma* is applied both to the bone and the arch. *Cyc.*

Zygomatic arch. See ZYGOMATIC

Zygomatic bone; the cheek bone.

Zygomatic muscles, two muscles of the face, which rise from the zygomatic bone, and are inserted into the corner of the mouth

Zygomatic processes, the processes of the temporal and cheek-bones, which unite to form the zygomatic arch.

Zygomatic suture; the suture which joins the zygomatic processes of the temporal and cheek bones. *Parr.*

ZŸ'MATE, } *n.* A supposed compound of the imagi-
ZŸ'MATE, } nary *zymic acid* with a base. As there is no such acid, there can be no such salt.

ZŸ'MIC-ACID, } *n.* [Gr. ζυμη, ferment.]
ZŸ'MIC-AC'ID, }

A supposed peculiar acid obtained by the acetous fermentation of vegetable substances. No such peculiar acid exists.

ZŸ'MOME, } *n* [Gr. ζυμη.]
ZY'MOME, }

One of the supposed proximate principles of the gluten of wheat It is a tough substance, insoluble in alcohol. There are doubts as respects the existence of *zymome*, as a truly distinct substance

ZŸ THEP'SA RY, *n.* A brewery, or brew house.

ZŸ'THUM, *n* [Gr. ζεω, to boil.]

A beverage: a liquor made from malt and wheat.

WEBSTER'S LARGER DICTIONARY OF THE ENGLISH LANGUAGE,

UNDER THE DIRECTION OF

N. PORTER,

PROFESSOR IN YALE COLLEGE.

PREFACE.

The publishers of Webster's larger English Dictionary, desiring to append to it tables prepared expressly for their edition, which should exhibit the correct pronunciation of Scriptural, Classical, and Modern Geographical Names, requested the subscriber to undertake the direction of the work. This service has been performed in the following manner: —

The list of Scriptural Names added by Taylor to his edition of Calmet's "Dictionary of the Bible," has been carefully collated with that prepared by Walker. In those cases in which the pronunciation of Walker differs from Taylor's, Walker's method has been subjoined, or substituted in its place. The methods of Walker and of Taylor generally coincide, and the authority of Taylor has been preferred to that of Walker in those instances only in which Walker's is opposed by the best and the established usage. The words omitted by Taylor have been added from Walker, and the table, in the number of names and in their pronunciation, is substantially the same with that which usually accompanies Walker's "Key."

The table of Greek and Latin Proper Names contains all the *classical* names which are found in Walker's table, together with such as are furnished in addition by Trollope, in his edition of Walker's "Key," and by Thomas Swinburne Carr, in his "Classical Pronunciation of Proper Names." A few have also been taken from Pauly's "Encyclopedia of Classical Antiquities," and from Freund's "Dictionary of the Latin Language."

This table has been revised by Professor Thacher, of Yale College. In conducting this revision, he found it necessary to correct numerous errors, especially in the division of words into syllables, which, from errors of the press, a confusion of principles, and a want of care in the application of the rules, have been accumulated in other published tables of Proper Names. It will be seen, on noticing the changes which have been introduced, that the aim has been to remove all inconsistencies in the application of the rules of pronunciation which have been adopted by Walker in common with many others.

A few errors of accent have also been corrected, as more recent investigations have ascertained the quantity of some words, which earlier lexicographers, guided only by the general rules of quantity, had given erroneously.

The pronunciation of these names is in all cases determined by the place of the accent, and by the forms of the syllables which the accent determines. To attempt to indicate to the English ear the *sounds* of the vowels by marks which in classical usage are employed to indicate their *quantity*, would only lead to confusion, and cannot fail to be especially disadvantageous to students of the languages. The classical table is accompanied by a few rules, designed to guide the scholar in settling those questions of pronunciation which are not answered in the table itself. These rules do not disagree with those adopted in Walker's "Key;" but, in connection with the table, will guide to that pronunciation which is in vogue at the University of Oxford and other learned schools. It is believed that these few rules will be found to be more convenient and useful than the corresponding ones in Walker's "Key."

The same preference will be given, it is believed, to the rules abridged from Walker, which accompany the Scripture Proper Names.

The Modern Geographical Names were mostly selected from Black's "General Atlas," (Edinburgh, 1846,) as being the latest and best authority. The design of the compiler was, primarily, to present the names of the countries, provinces, important towns, rivers, &c., on the continent of Europe and Spanish America, and to indicate their pronunciation as perfectly as this can be represented by English sounds. As these names frequently occur in books of all kinds, and occasion great perplexity to the reader and public speaker, and as their pronunciation is conformed to that of the languages to which they belong, it was thought advisable to prepare a copious list of words of this character, and to give them the chief place in the table. When these words have been Anglicized, the Anglicized has been subjoined to the native pronunciation.

To these European names many others have been added of places in Great Britain and the United States, in respect to the pronunciation of which, it was thought, information would be esteemed of any value, or could be given with any exactness. In a few instances, a provincial, and what will be thought by some an improper, method has been given. It was thought, however, to be impossible and useless to attempt to furnish a complete list of English and American names, with their pronunciation. The pronunciation of the great majority of these names is familiar to all, and is never sought for in a dictionary, while that of a very large number can hardly be considered as fixed.

A few names of places in other and ruder countries are given. There are two reasons, however, why it was not thought expedient to swell the list with names of this character. They are, in most cases, the result of an effort to represent native sounds by English spelling. If this representation is imperfect, it is of little authority, and is liable to constant changes. If it is perfect, or nearly so, the pronunciation is indicated by the name itself.

The catalogue of European names was prepared by a gentleman familiar with the countries and the languages in which the names occur; and it is believed that the pronunciation and the accent are as well represented as the nature of the work and the means at hand would allow. No pains have been spared to render this table as complete and convenient as any within reach of the public.

PRONOUNCING VOCABULARY

OF

SCRIPTURE PROPER NAMES.

RULES

FOR THE

PRONUNCIATION OF SCRIPTURE PROPER NAMES.

[ABRIDGED FROM WALKER'S KEY.]

1. In the pronunciation of the letters of the Hebrew proper names, we find nearly the same rules prevail as in those of Greek and Latin. Where the vowels end a syllable with the accent on it, they have their long, open sound; as, *Na'bal*, *Je'hu*, *Si'rach*, *Go'shen*, and *Tu'bal*

2. When a consonant ends the syllable, the preceding vowel is short; as, *Sam'u-el*, *Lem'u-el*, *Sim'e-on*, *Sol'o-mon*, *Suc'coth*, *Syn'a-gogue*.

3 Every final *i* forming a distinct syllable, though unaccented, has the long, open sound; as, *A'i*, *A-ris'a-i*

4. Every unaccented *i* ending a syllable not final, is pronounced like *e*; as, *A'ri-el*, *Ab'di-el*, pronounced *A're-el*, *Ab'de-el*.

5. The vowels *ai* are sometimes pronounced in one syllable, and sometimes in two; as, *Ben-ai'ah*, *Hu'shai*, *Hu'rai*, &c; or, as *Sham'ma-i*, *Shash'a-i*, *Ber-a-i'ah*, &c., following in these, as in most Hebrew proper names, the pronunciation of the Septuagint version of the Bible.

6. *Ch* is pronounced like *k*; as, *Chemosh*, *Enoch*, &c, pronounced *Kemosh*, *Enok*, &c. *Cherubim* and *Rachel* seem to be perfectly Anglicized, as the *ch* in these words is always heard as in the English words *cheer*, *child*, *riches*, &c. The same may be observed of *Cherub*, signifying an order of angels; but when it means a city of the Babylonish empire, it ought to be pronounced *Ke'rub*.

7. Almost the only difference in the pronunciation of the Hebrew and the Greek and Latin proper names, is in the sound of the *g* before *e* and *i*. In the last two languages, this consonant is always soft before these vowels; as, *Gellius*, *Gippius*, &c., pronounced *Jellius*, *Jippius*, &c.; and in the first, it is hard; as, *Gera*, *Gerizim*, *Gideon*, *Gilgal*, *Megiddo*, &c. This difference is without foundation in etymology; for both *g* and *c* were always hard in the Greek and Latin languages, as well as in the Hebrew: but the latter language being studied so much less than the Greek and Latin, it has not undergone that change which familiarity is sure to produce in all languages. The solemn distance of this language has not been able, however, to keep the letter *c* from sliding into *s* before *e* and *i*, in the same manner as in the Greek and Latin. Thus, though *Gehazi*, *Gideon*, &c., have the *g* hard, *Cedrom*, *Cedron*, *Cisai*, and *Cittern*, have the *c* soft, as if written *Sedrom*, *Sedron*, &c. The same may be observed of *Igeaburim*, *Igeal*, *Nugge*, *Shage*, *Pagiel*, with the *g* hard; and *Ocidelus*, *Ocina*, and *Pharacion*, with the *c* soft, like *s*.

8. Gentiles, as they are called, ending in *ines* and *ites*, as *Philistines*, *Hivites*, *Hittites*, &c, being Anglicized in the translation of the Bible, are pronounced like formatives of our own; as, *Philistins*, *Whitfieldites*, *Jacobites*, &c.

9. The unaccented termination *ah*, so frequent in Hebrew proper names, ought to be pronounced like the *a* in *father*. The *a* in this termination, however, frequently falls into the indistinct sound heard in the final *a* in *Africa*, *Ætna*, &c.; nor can we easily perceive any distinction in this respect between *Elijah* and *Elisha*; but the final *h* preserves the other vowels open, as *Colkozeh*, *Shiloh*, &c., pronounced *Colhozee*, *Shilo*, &c. The diphthong *ei* is always pronounced like *ee*; thus *Sa-mei'us* is pronounced as if written *Sa-mee'us*. But if the accent be on the *ah*, then the *a* ought to be pronounced like the *a* in *father*; as, *Tah'e-ra*, *Tah'pe-nes*, &c.

10. It may be remarked, that there are several Hebrew proper names, which, by passing through the Greek of the New Testament, have conformed to the Greek pronunciation; such as *Aeldama*, *Genezareth*, *Bethphage*, &c., pronounced *A-sel'da-ma*, *Je-nez'a-reth*, *Beth'pha-je*, &c. This is, in my opinion, more agreeable to the general analogy of pronouncing these Hebrew-Greek words than preserving the *c* and *g* hard.

Rules for the Quantity of the Vowels.

11 In dissyllables, with but one middle consonant, the first vowel is accented and pronounced long; as, *Kō'rah*, *Mo'loch* The same analogy is observed in the penultimate of polysyllables; as, *Balthā'sar*.

12 When the accent is on the antepenultimate syllable, the vowel is always short, except when followed by two vowels; thus, *Je-hos'a-phat*. The secondary accent has the same shortening power when the primary accent is on the third and the secondary on the first syllable, as, *Oth-o-ni'as*.

Rules for placing the Accent on Hebrew Proper Names.

13. The accent of Hebrew words cannot be better regulated than by the laws of the Greek language. By this it is not intended that every word which is Græcized in the Septuagint should be accented exactly according to the Greek rule of accentuation. For many words, that are purely Greek, do, when they are Anglicized, receive the Latin accentuation, instead of retaining the Greek When the Hebrew word has been Græcized *into the same number of syllables*, we prefer the Latin accentuation to what may be called our own. Thus we accent *Cathua* on the penult, since it comes to us through the Greek *Καθουά*, and because the Latins would have placed the accent on this syllable, and notwithstanding that the English ear would be better pleased with the antepenultimate accent But when the Hebrew word does not contain the same number of syllables as the same word in the Greek, — as *Mes'o-bah*, *Μεσοβία*, *Id'u-el*, *Ἰδουήλος*, — it comes under our own analogy, and we place the accent on the antepenultimate.

14 As we never accent a proper name from the Greek on the last syllable, so, if the Greek word be accented on any other syllable, we seldom pay any regard to it, unless it coincide with the Latin accent Thus the word *Ged-e'rah* is accented on the penultimate, because it is Græcized by *Γάδηρα*, though it is accented on the antepenultimate, and this because the penultimate is long, and the long penultimate in Latin always has the accent.

15. All words ending in *ias* and *iah* have the accent on the *i*, without any foundation in the analogy of Greek and Latin pronunciation, except the very vague reason that the Greek word has the accent on this syllable. This reason is called vague, because the Greek accent has no influence on words in *ael*, *iel*, *ial*, &c.; as, *Ἰσραήλ*, *Ἀβδιήλ*, *Βηλιάλ*, *κ. τ. λ.* Hence the impropriety of pronouncing *Messias* with the accent on the first syllable. It is the broad, diphthongal sound of the English *i*, with the accent on it, which makes the word sound so much better in English than it does in French, or even in the true ancient Greek pronunciation.

16. The termination *aim* seems to attract the accent on the *a* only in words of more than three syllables; as *Ephraim*, *Mizraim*, have the accent on the antepenultimate, but *Horonaim*, *Ramathaim*, &c., on the penultimate. This is the general rule; but if the Greek word have the penultimate long, the accent ought to be on that syllable; as, *Pharsa'im*, *Φαρσούμ*, &c.

17. *Kemuel*, *Jemuel*, *Nemuel*, and other words of the same form, having the same number of syllables as the Greek words into which they are translated, ought to have the accent on the penultimate, as that syllable is long in Greek; but *Emanuel*, *Samuel*, *Lemuel*, are irrecoverably accented on the antepenultimate, and follow the analogy of the English accentuation.

18. It is plain from these observations, that the Hebrew accent is regulated by a sort of compromise between this ancient language and our own; and the best we can do is to form a kind of compound ratio of Hebrew, Greek, Latin, and English, and to let each of these prevail as usage has permitted them.

PRONOUNCING VOCABULARY

OF

SCRIPTURE PROPER NAMES.

THE basis of the following Vocabulary is that of Taylor, in "Calmet's Dictionary of the Bible." To this have been added several hundred names from Walker. In the cases in which the pronunciation of Walker differs from that of Taylor, that of Walker is added or substituted in its place. The pronunciation of Walker is not always to be preferred, nor is it followed in actual usage by the best authorities. The notation of the vowel sounds may be consulted below.—ED.

RULES

FOR

PRONOUNCING THE VOWELS AND CONSONANTS

OF

GREEK AND LATIN PROPER NAMES.

It will be perceived by a glance at the following table, that the indicated accentuation of the words, and their separation into syllables, prevent the necessity of inserting any thing here to guide to a correct pronunciation, except the rules for the sounds of the vowels and consonants

In settling the place of the primary accent, which is the first and most important point in the pronunciation of a word, the aim, of course, has been to follow the ancient and simple rules, which direct, that, in words of two syllables, the penult be accented, and in words of more than two syllables, that the penult be accented if long in quantity, if not, the antepenult The words have been divided into syllables, in accordance with the commonly received rules on that subject. The rules that follow have been derived, in the main, from Walker. Sometimes the language of Grant, or some other grammarian, has been preferred.

Rules for the Vowels.

1. Any vowel at the end of an accented syllable, and *e*, *o*, and *u*, at the end of an unaccented syllable, have the long English sound; as, *Ca'to*, *Ce'crops*, *Di'do*, *So'lon*, *Cu'mæ*, *Me-lis'sa*, *Mo-los'sus*, *Tu-lin'gi*; in which words the final vowels of the first syllables have the same sound as the corresponding vowels in the first syllables of the English words *pa'per*, *ce'dar*, *si'lent*, *co'lon*, *du'ty*.

2. *A*, ending an unaccented syllable, has the sound of *a* in *fa'ther*; as, *Ga-bi'na*, *A-re'ne*, pronounced *Gah-bi'na*, *Ah-re'ne*.

3. *I*, ending a final syllable, or preceding an accented vowel, has the long sound; as, *I-u'li*

In all other cases, *i*, ending an unaccented syllable, is pronounced like *e*; as, *Fa'bi-i*, *Ho-ra'ti-i*, pronounced *Fa'be-i*, *Ho-ra'te-i*.

4. *Y* is pronounced as *i* would be in the same situation.

5. *Æ* and *œ* are pronounced as *e* would be in the same situation.

6. If a syllable end in a consonant, the vowel has the short English sound; as, *Bal'bus*, *Del'phi*, *Cin'na*, *Mos'chus*, *Tus'cus*, in which the vowels have the same sounds as in the English words *man'ner*, *sel'dom*, *din'ner*, *scaf'fer*, *mus'ter*.

Exception. — *E*, in final *es*, is pronounced as in the familiar proper name *An'des*.

Rules for the Consonants.

1. *C*, before *e*, *i*, *y*, *æ*, and *œ*, is pronounced like *s*; before *a*, *o* and *u*, and before consonants, like *k*; as, *Cre'a*, *Cic'e-ro*, *Cy'prus Cæ'sar*, *Cæ'li-a*, *Cu'to*, *Co'cles*, *Cu'mæ*

2. *G*, before *e*, *i*, *y*, *æ*, *œ*, or another *g* followed by *e*, has the sound of *j*; before *a*, *o*, and *u*, and before consonants other than *g*, as above excepted, the hard sound, as in the English words *gave*, *gone*; as, *Ge'la*, *Gi-gan'tes*, *Gy-gæ'us*, *Ag'ger*, *Ga'bi-i*, *Gor'gi-as Sa-gun'tum*

3. *Ch* has the sound of *k*, except when preceding a mute consonant at the beginning of a word, when they are silent; as, *Chtho'ni-a*, pronounced *Tho'ni-a*.

4. *T*, *s*, and *c*, before *ia*, *ie*, *ii*, *io*, *iu*, and *eu*, preceded immediately by the accent, in Latin words, as in English, change into *sh* and *zh*. But when the accent falls on the first of the vowels following, the consonant does not change into *sh* or *zh*, but preserves its pure sound; as, *Mil-ti'a-des*, &c *T*, in the termination *tion*, also retains its original sound; as, *The-o-do'ti-on*.

5. *S* has, in general, the sound of *s* in *this*.

Final *s*, preceded by *e*, or a liquid, has the sound of *z*.

6. Initial *x* has the sound of *z*.

7. Initial *ph*, before a mute, is silent; as, *Phthi'a*, pronounced *Thi'a*. Initial *p*, before *s*, is silent; as, *Psy'che*, pronounced *Sy'ke* Initial *p*, before *t*, is silent; as, *Ptol-e-mæ'us*, pronounced *Tol-e-mæ'us*

8. At the beginning of Greek words we frequently find the uncombinable consonants *mn*, *tm*, &c.; as, *Mne-mosy-ne*, *Tmo'lus*, &c. These are to be pronounced with the first consonant mute, as if written *Ne-mosy-ne*, *Mo'lus*, &c

PRONOUNCING VOCABULARY

OF

GREEK AND LATIN PROPER NAMES.

THE words in the following table to which a * is prefixed are taken from "The Classical Pronunciation of Proper Names," &c., by Thomas Swinburne Carr.

Those to which a † is prefixed are such as Trollope has added to his edition of Walker's Key.

Those marked with a ‡ are taken from Freund's "Worterbuch der lateinischen Sprache."

Those marked with a § are taken from Pauly's "Real Encyclopadie der classischen Alterthumswissenschaft."

Those to which no mark is prefixed are found in the list usually published with Walker's Key.

It will be observed, by any who may compare this table with those of Walker and Trollope, that many changes in the division of words for pronunciation have been introduced; but it is believed that these changes are all required by a consistent application of the rules of classical pronunciation, as they are generally received.

PRONOUNCING VOCABULARY

OF

MODERN GEOGRAPHICAL NAMES.

BRIEF RULES

FOR THE

PRONUNCIATION OF THE PRINCIPAL EUROPEAN LANGUAGES.

FRENCH.

1. Vowels.

A, *ah*, long and short, (marked *ä*)
ai, as *e* in *there*, when followed by *e*, *re*, *rs*, *ts*, *s*, and when it has the circumflex, thus, *aî*, (*ê*.)
When in the middle or at the end of words, it has the sound of the open acute *é* (*ę*.)
au has the sound of *ŏ*, (*o*)
E has three sounds: —
é as the English vowel *a* in *fate*, (*ę*)
è and *ê* are similar to the *e* in *there*, (*ê*.)
E, not accented, is either,
(1.) open acute, as *e* in the English words *met*, *ebb*, when it is followed, in the same syllable, by a consonant that is pronounced, or when the following syllable begins with *x*, (*ė*;)
(2.) guttural, and like *e* in *her* at the end of monosyllables, or the first syllable of polysyllables, (*ë*;) or,
(3.) is entirely mute at the end of polysyllables. It is like the second *e* in *there*, and generally serves to lengthen or open the preceding vowel. In other places, where it is more perceptible, it is like the *e* in *battery* or *over*; and even then the French suppress it as often as they can, especially when the preceding or following syllable has a full sound. — Rem. *Es*, not accented, in polysyllables, is silent.
Ei has the sound of *e* in *there*, (*êu*.)
Eu has three sounds: —
(1.) long and close. This sound has no standard in English, but it may be obtained by pressing the lips a little forward, in such a manner as to leave to the breath a narrower passage than for the *e* in *over*, and by dwelling longer upon it, (*ĕü*.)
(2.) short, somewhat more open than *e* in *over*, (*ĕü*.)
(3.) long and open, by opening the lips somewhat wider and in a more circular form than for the *e* in *over*, and by protracting the sound, (*ĕü*.)
I is long, as in the English word *marine*, and short, as in *fig*, (*ī*, *ĭ*)
O has three sounds: —
(1.) long and open, as in the English word *robe*, (*ŏ*.)
(2.) short, as in *rob*, (*o*.)
(3.) long and broad, (*o*.)
oi as *wa*.
ou has two sounds, — long, as in *mood*; short, as in *good*, (*oo*.)
U has two sounds, — long, as in *vue*, (*ü*;) short, as in *but*, (*ŭ*.)

There is no standard for these sounds in English. To form the first, observe the situation of the tongue in pronouncing the English letter *a*. It widens itself into the cheeks, so that it touches the first grinders. When the tongue is in this situation, advance both lips a little forward, shutting them at the same time in such a manner as to leave a narrow, oval passage to the breath. This movement will lightly press the tongue between the grinders, and its tip against the fore teeth of the inferior jaw, and thus let the breath pass, which is necessary to emit the sound of the French *u*. The short sound is formed by dwelling less upon it.

2. Consonants.

Division of Syllables. — When syllables in any word are separated by a single or compound consonant, that consonant is to be spelled and articulated with the following vowel, and not with the preceding one. By several consonants which cannot form a compound consonant, the first must be spelled with the preceding, and the remainder with the succeeding, simple or compound vowel.

Compound consonants are the following: — *bl*, *br*, *ch*, *cl*, *chr*, *cr*, *dr*, *fl*, *fr*, *gl*, *gn*, *gr*, *il*, and *ill*, (when liquid,) *ph*, *phl*, *phr*, *pl*, *pr*, *rh*, *sc*, *sg*, *sl*, *sm*, *sn*, *sp*, *st*, *sr*, *th*, *thl*, *tr*, *tl*, *vr*.

The French syllables are divided into masculine and feminine syllables, the latter being those that contain *e* mute.

General Rule. — Every masculine syllable before another masculine syllable is short, so that the accent lies upon the last syllable that is pronounced.

B has the same sound as in English.
C has,
(1.) the sound of English *k* before *a*, *o*, *u*, and before consonants;
(2.) the sound of hard *s* before *e*, *i*, *y*, and before the hard vowels, *a*, *o*, *u*, when with a cedilla, (*ç*.)
c, before *q* and *c*, and after a nasal sound, is always silent.
ch has the sound of *sh*, and followed by a consonant, it is like *k*. At the end, it sounds like *k*.
D is like English *d*. It is sounded at the end of words, unless followed by *s* or preceded by *r* or *n*.
F is like English *f*.
G has two sounds: —
(1.) the sound of *g* in *go*, before *a*, *o*, *u*.
(2.) the sound of *s* in *pleasure* before *e*, *i*, *y*.
The hard *g* is rendered soft before *a*, *o*, *u*, by inserting the letter *e* between *g* and *a*, *o*, *u*. The *e* after the *g* is then not to be sounded, but is considered as a mark to show that the *g* must be pronounced soft.
The soft *g*, on the other hand, is rendered hard before *e*, *i*, *y*, by writing the letter *u* between *g* and *e*, *i*, *y*. Therefore the *u* that is immediately after the *g* must not be sounded, but is to be considered as a sign that *g* must be articulated hard.
gn is pronounced like *ni* in *onion*, *minion*, (final *gne*, represented in the table *ny*.)
Final *g* is silent except in the noun *bourg*, and in nouns terminating in *berg*, where it has the sound of *k*.
H is either aspirated or silent.

Remark. — When *h* is deemed aspirate, it only communicates to the vowel the properties of a consonant; that is to say, when the preceding word ends with a vowel, that vowel is never suppressed; if it ends with a consonant, that consonant is never connected with the vowel that follows.

J has always the sound of *z* in *azure*, or *s* in *pleasure*.
L has two sounds: —
(1.) It is like the English *l*.
(2.) It is liquid, like *l* in *brilliant*.

N. B. — The modern pronunciation, however, lets the *l* entirely disappear, and substitutes a long *ē* sound (*ī*, *ĭĭ*) for it.

Exception. — All nouns in *ille* are not liquid.

ll, *ill*, preceded by another vowel, are always liquid, in which case, *il*, *ill*, are compound consonants, the *i* being considered as a mere sign to make the *l* liquid; therefore the *i* must not be combined with the preceding vowel, which preserves its natural sound.

M, *N*, } when not nasal, are like the English *m*, *n*.

m, *n*, preceded in the same syllable by a vowel, are always nasal, unless followed by a syllable that begins with a vowel or *h* mute, in which case, *m* and *n* resume their natural sound.

NASAL SOUND. — An exact standard for the nasal sound is not to be found in the English pronunciation. However, something like it is found in the sound of *en* in *encore*. But if, in pronouncing these sounds, the tongue should once touch the roof of the mouth, the French nasal sound would be ruined.

There are four nasal sounds —

em, am, en, an, } *ang*.
om, on, aun, } *ong*, or *ông*

im, in, aim, ain, eim, ein, o-in, } *ang*.
um, un, eun, eum, } *ung*.

P is like the same letter in the English language.

Q, except in a few words, is always followed by *u*, and these two letters together have the sound of English *k* in *king*

R is much more rolled than the English *r*. At the end of a word it is always pronounced, when preceded by *a*, *i*, *o*, *u*, *y*, and their compounds.

r, preceded by *e* in polysyllables, is silent, and in this case the *e* has the acute sound *é*. In monosyllables, the *r* is pronounced, and the *e* has a more open sound, resembling *è*.

rh is like *r*.

S has two sounds. —

(1.) the soft of *rose*, *please*, between two vowels and following *b*.

(2.) the hard sound of *sister*, in the beginning, and in the middle of a word, when preceded or followed by a consonant.

Final *s* is silent, with a few exceptions.

T has two sounds: —

(1.) soft, like *c* in *cedar*, *civil*, in the syllable *tion*, unless preceded by *s* or *x*, in which case the *t* is hard.

(2.) hard, like *t* in *tat*, in all other cases

th has the single sound of *t* hard.

t, *st*, *ct*, final, are silent.

V is like English *v*.

X, (1.) is like *gs* in all words beginning in *x* or *cr*, followed by a vowel or the letter *h*.

(2.) like *k* in words beginning in *exce*, *exci*, *exs*.

(3.) like *ss*, in *Aix*, *Aix la Chapelle*, *Auxerre*, *Auxonne*, *Bruxelles*, *Luxeuil*, and some few others.

(4.) like *ks* in all other cases

Final *x* is silent.

Z is like *z* in *zone*.

Final *z* is silent.

Y is like single French *i*, but like double *i* between two vowels.

ITALIAN.

1. VOWELS.

A is sounded as *ah* in English, (*a*.)

E has two sounds: —

(1.) the open, as in the English word *fair*, (*e* and *è*.)

(2.) close, as in the word *pain*, (*é*.)

I is sounded like *ee* in English.

O has two sounds: —

(1.) the open *o*; (2.) the close *ô*.

U is sounded like *oo*.

N. B. — When these vowels are at the end of words, marked with an accent, they have a quick and sharp sound.

2. CONSONANTS.

B is like the same letter in English.

C is like *k* before *a*, *o*, *u*. Followed by the vowels *e*, *i*, it is pronounced like *ch* in the words *cherry*, *chilly*.

cc followed by *e*, *i*, is pronounced like *tch* in the English word *match*

cia, *cio*, *ciu*, are pronounced *cha*, *cho*, *choo*.

ch, followed by *e*, *i*, is pronounced like English *k*.

D and *F* are like the English *d* and *f*

G is like the English *g* in *go*, when followed by *a*, *o*, &c. Followed by the vowels *e*, *i*, it is like *j* in English, or like *g* in the words *gem*, *ginger*.

gg, followed by *e*, *i*, is pronounced like *dg* in the English word *lodge*

gh, followed by *e*, *i*, has the sound of *g* in *go*.

gl, followed by *i*, and in all words in which *i* is followed by another vowel, is pronounced like *ll* in *brilliant*.

But in all words in which *gl* is followed by a consonant, it is pronounced like *gl* in *glimmer*.

gn, followed by *a*, *e*, *i*, *o*, *u*, is somewhat like the English *ni* in *onion*, *minion*

gia, *gio*, *giu*, are pronounced like *ja*, *jo*, *joo*

gua, *gue*, *gui*, are like *gwa*, *gwei*, *gwee*, in *language*, *languei*, *languid*

H has no sound. It is only used to denote the hard sound of the consonants *c*, *g*, before the vowels *e*, *i*.

J is considered a vowel. It is used instead of *ii* at the end of words, and sounds like *ee* in the English word *fee*, each *e* being distinctly pronounced

L, *M*, *N*, and *P*, are like the corresponding English letters.

Q *Qua*, *que*, *qui*, *quo*, are pronounced like *qua*, *que*, *qui*, *quo*, in the English words *quality*, *question*, *quibble*, *quote*; the vowels *a*, *e*, *i*, *o*, adhering to their proper pronunciation, as stated above

R, in the beginning of words, or in the middle when it begins a syllable, is like *r* in the words *ruin*, *marine*. At the end of words, or when it ends a syllable, or preceded by another consonant, or doubled, it has a rolling sound

S, in the beginning of words, preceded or followed by another consonant, or when doubled, is pronounced sharp, like *sister* Between two vowels, and in the last syllable of all substantive and adjective nouns that end in *ese*, *uso*, *usa*, it is pronounced like *s* in the English word *rose* In the last syllable of all adjective nouns in *oso*, *osa*, *s* preserves its sharp sound

sc, followed by *e*, *i*, is pronounced like *sh* in *shell*

sch, followed by *e*, *i*, is pronounced like *sk*.

scia, *scio*, *sciu*, are like *sha*, *sho*, *shoo*.

T is always hard, and

V like the English *v*.

W and *X* are not found in the Italian alphabet

Z GENERAL RULE — In the beginning of words, or when single, it is like *ds* in the English word *Windsor* When preceded by a consonant, or when followed by two vowels, or when doubled, it is pronounced sharp, like *ts* in the word *benefits*.

REMARK — Italian words are pronounced exactly as they are written, there being no silent letter, except *h* Every vowel always preserves its proper sound, independently of the consonants which accompany it.

SPANISH.

1. VOWELS.

A. This letter is pronounced as *ah* in English, (*a*.)

E is pronounced as *a* in the alphabet in English, (*e*,) except before *n*, *r*, *s*, *z*, in which case it is more open, as in the English word *care*.

I is pronounced as *e* in English. It is long when under the acute accent, (*i*.)

O is generally pronounced as in English. It is, however, necessary to observe, that it is sometimes open, (*o*,) sometimes close, (*ô*,) and sometimes long, (*ô*.)

It is open in words of one syllable, when it is not immediately followed by another vowel, and before *n* and *r* at the end of a syllable; at the end of a word, when it is accented. It is long whenever it is immediately followed by another vowel.

U is pronounced *oo*.

N. B. — From this rule must be excepted the syllables *gue*, *gui*, *que*, *qui*, in which the *u* is not sounded, unless the *u* has two dots over it, (ü)

Y. This letter is sometimes a vowel and sometimes a consonant. It is a vowel when it is preceded by another vowel, making with it a diphthong; and then
ay and *ey* are like *i*, (ī)
oy and *uy*, like *oi*.
In almost every other case, it is a consonant.

2. Consonants.

B, in the beginning of a word, is always pronounced as in English. In the middle of a word, between two vowels, *b* is softened into nearly a *v*
C has the sound of *th* in English, as in the word *pith*, before *e* and *i*; and the sound of *k* before *a*, *o*, *u*.
Formerly the *c* with the cedilla (ç) was used to soften the *c* before *a*, *o*, *u*. The letter *z*, however, has now been substituted for it
Double *cc*, followed by *e*, *i*. The first *c* is hard, the second soft
ch. These two letters are pronounced as in English in the word *check*.
D is pronounced, in the beginning of a word, as in English; but when the *d* is between two vowels, it is as soft as the *th* in the words *though*, *the*. It is pronounced lisping at the end of a word
F is pronounced as in English.
G is pronounced as in English before *a*, *o*, *u*. It is guttural before *e*, *i*, (ğ.) Before *n*, it has the English pronunciation.
For the syllables *gue*, *gui*, see the vowel *U*.
H is mute, and only lightly aspirated before *ue*. The letter *h* has been retained in many words, though not pronounced, and in several it has taken the place of the letter *f*, formerly used
th. The Academy suppresses *h* after *t*, and instead of *ph* uses *f*.
J is guttural before all the vowels, (ğ, ȟ.)
L is pronounced as in English
ll. When *ll* occurs in a word, it is liquid, and pronounced as in the words *brilliant*, *saraglio*, *William*.
M and *N* are pronounced as in English.
ñ, having this mark, (˜, ñ,) which the Spaniards call *n* with *tilde*, (til'de,) has the same sound as *n* in *onion*, *minion*.
P and *Q* are pronounced as in English.
As to the syllables *que*, *qui*, look for the vowel *U*.

N. B. — *Q* is changed into *c* in all words where it is followed by *ua*, *uo*, *ue*, *ui*, (the *u* in the latter two preserving its natural sound)

R, in the beginning and middle of words, is pronounced a little stronger than in English; but double *r* is much stronger than the English *rr*.
S is always pronounced hard, like double *s*, even between two vowels
T is always hard.
V. The Spaniards often confound the sound of this letter with that of *b*; but the Academy disapproves of it, and recommends that it should be pronounced as in English
X is pronounced as *s* when followed by a consonant; and it is lightly sounded *s* when followed by *ce*, *ci* It is pronounced like *ks* between two vowels. In a few words ending in *x*, it is guttural.

N. B. — *X* was formerly used as a guttural, (unless the following vowel had the circumflex accent,) but *j* is now used instead before *a*, *o*, *u*, and *g* before *e* and *i*.

Z is only used now before *a*, *o*, *u*, and is pronounced like the *c* before *e* and *i*. It is always pronounced lisping after a vowel.

The pronunciation of Spanish by the Mexicans is different from that by the Spaniards: —
(1.) They pronounce the liquid *ll* like the modern French pronunciation long *ee*.
(2.) They pronounce *b* and *v* interchangeably.
(3.) They substitute, in general, the *s* sound for the *th* sound.

PORTUGUESE.

1. Vowels.

The vowels are the same as in the Spanish language.
Ao, the *o* having a deep sound, nearly *oo*, is somewhat like *oung*.

2. Consonants.

The consonants, with the following exceptions, are like the English: —
C. *ç* is like the same French letter.
ch is like English *sh*.
G is like the French *g*.
H is always silent, and serves only, when immediately preceded by *l* or *n*, to make these letters liquid.
J is like the corresponding French letter.
M and *N* are like the same English letters, but have sometimes a nasal sound.
Q is like the French, being always accompanied by a silent *u*.
R is like the Spanish, rolling.
X is like English *sh*.

GERMAN.

1. Vowels.

A has two sounds: —
(1.) long, (ā,) as in the English word *half*.
(2.) short, (ă,) which has no corresponding sound in English.
ae, or *ä*. (1.) long, as the sound between *name* and *care*; (2) short, nearly like *e* in the word *rent*.
ai and *ay* sound broader than the English *i* in *kite*.
au approaches the sound of the English *ou* in *our*, *loud*.
aeu or *äu* has nearly the same sound as the English *oi*.
E has three sounds: —
(1) long; 1st, the close or acute sound (ę), the French *e fermé*. 2d, the open sound, (ę̆,) the *e ouvert* of the French.
(2.) short, (ę̆,) nearly like *e* in the word *help*
(3.) obscure in all unaccented syllables, like *a* in the English word *sofa*, except before liquids, where it sounds like *e* in the last syllable of the word *heaven*
ei, or *ey*, are like *i* in *fine*, *kind*.
eu is similar to *oi*, *oy*, in *boil*, *toil*, *joint*.
I has two sounds: —
(1.) long, as in *mete*, (ī.)
(2) short, nearly as *i* in *pin*, *fig*, (ĭ)
ie is like long *i*, (ī.)
O is, (1.) long, as in *bone*, (ō;) (2.) short, (ŏ,) as in *got*.
oe, *ö*. (1.) long, French *eu*; (2.) short, French *eu*.
oi, *oy*, are like the English *oi*, *oy*.
U has two sounds: —
(1.) long, (oo,) as in *to*, *do*, *move*, *prove*.
(2.) short, (o͝o,) resembling *u* in *bull*, *full*, *bushel*.
ue, *ü*. (1.) long French *u*; (2.) short French *u*.
N. B. — *Aa*, *oo*, *ee*, are pronounced as a single long *a*, *o*, *e*.

2. Consonants.

B is like the English *b*. But when it ends a syllable, or stands next to the final consonant or consonants, not being liquids, or the consonant *b*, it approximates to the sound of *p*.
C before *a*, *o*, *u*, *au*, and before a consonant, is pronounced like *k*. Before the other vowels, with a few exceptions, it is like *ts*.
D is like the English *d*. But at the end of a syllable, it approximates to the sound of *t*.
F is like English *f*.
G, in the beginning of a syllable, is always like *g* in the English word *go*. After *a*, *o*, *u*, *e*, *i*, *ä*, *ö*, *ü*, *l*, *r*, it has a peculiar lingual sound, somewhat softer than the guttural *ch*. (See *Ch*.)
When preceded by *n*, *g* (except in derivative and compound words) has the sound of a gentle *k*.
H, in the beginning of a word or syllable, is aspirated, as in the English words *have*, *hold*. Between two vowels, the aspiration is less strong, and sometimes hardly perceptible. At any other place than in the beginning of a word or a syllable, *h* is mute, and indicates then the length of the preceding vowel.
th is pronounced as a single *t*.

J is pronounced as *y*, and always followed by a vowel.
K is like English *k*.
L, *M*, *N*, and *P*, are like the corresponding English letters.
Q is always joined with *u*. It has the sound *kw*, but is uttered shorter than in English.
R is sounded stronger than in English.
S is always like *z*, except before a consonant and at the end of a word or syllable, where it is pronounced sharp. It is also pronounced like *z* between two vowels and after a liquid.
T is like English *t* Before *i* and a following vowel, *t* is pronounced like *ts* But when *s* precedes *t*, *t* keeps its proper sound.
V is always like *f*.
W is like *v*. The *w* in final *ow* is always silent.
X is like *ks*.
Z is like *ts*.

3. Compound Consonants.

Ch is always guttural when preceded by a vowel, or a vowel and a liquid *Ch*, in the beginning of a word, followed by *a*, *o*, *u*, or a consonant, is like *k*.
Chs, in primitive words, is like *ks*.
Sch, in primitive words, is like *sh*.
Gn and *Kn*. Both the *g* and *k* are hard.
Ph is like *f*
Sz is like hissing *s*.
Tz doubles the sound of *z*.

Spelling. — When two vowels are divided by a single or compound consonant, that consonant is spelled and articulated with the second vowel; by more than one consonant, all but the last single or compound consonant belong to the first vowel

DUTCH.

1 Vowels.

A has two sounds, like the German *a*
aa, *ae*, } are pronounced like long *a*.
E has the three sounds of the German *e*.
ee is like long open *e*.
I has the two German *i* sounds.
ie is like the German *ie*
O has the two German *o* sounds.
oo is long *o*.
oe is pronounced as *oo*.
U has the two French *u* sounds.
ui resembles the English *oi* in *boy*
Y, or sometimes spelt *ij*, is equivalent to the German *ei*, *ey*, or the English long *i* sound.

2. Consonants.

The consonants are the same as the German, except the following ones: —
G is always strong guttural, unless spelt *gh*, which is like *g* in the English word *go*, or at the end of a word preceded by *n*.
Sch is not pronounced as *sh*, but as *sk*.

SWEDISH.

There are nine vowels, *a*, *e*, *i*, *o*, *u*, *y*, *å*, *ä*, (*æ*,) *ö*, (*œ*;) and it is to be remarked, that they are never found compound.

1. Vowels.

A is like the German *a*.
å is long *o*, (*ô*.)
ä (*æ*) is like the German *ä*, (*æ*)
E has two different pronunciations: —
(1.) long, (the close and acute sound of the German *e*, — *é*,) in the beginning of words, where *e* makes a syllable by itself, and at the end of a syllable or a word, as also in all syllables that have the tonic accent, and in all words terminating in *het*.
(2.) like *æ*, or German *e* short, when it precedes the consonants *f*, *l*, *m*, *n*, *r*, *s*.
I is like the German *i*
O. (1.) *O* is like a deep *oo*, in the beginning of words, when it is a syllable by itself, and at the end of a syllable or a word.
(2.) It is like a long *o*, when it is immediately followed by one of the consonants *f*, *l*, *m*, *n*, *r*, *s*, *t*, and before double consonants
ö (*ô*) is like the corresponding German letter.
U has almost always a sound like that of *i–oo* combined.
Y is like the French *u*

2. Consonants.

The consonants are the same as the English, with the following modifications: —
G, before *a*, *o*, *u*, *å*, is always hard, as in the English word *go*, and also before *e*, when it is pronounced like *ae*.
Before *i*, *y*, *ä*, *ö*, and before the close and acute *e*, it is like the English *y*; but the *g* retains its hard sound when the acute *e* terminates the syllable. See *J*.
gjo, *gju*, has, in common pronunciation, the sound of *yo*, *yoo*.
H is always aspirated, except before *v* and *j*, where it is silent, and in *ch*, which is pronounced like *k*
J is like the English *y* In all those words where *j* is changed into *g*, that *g* has a very slight guttural sound
K is hard before *a*, *o*, *u*, *å*, and *e*, (having the sound of *æ*,) and before *e* acute, terminating the syllable or word
k, before the vowels *i*, *y*, *ä*, *ö*, and *e* acute, is pronounced as if there were Swedish *j* between *k* and the vowel.
In common pronunciation, *k* before the mentioned vowels, and *kj* before *a*, *o*, *u*, *å*, sound like English *ch*
L, beginning a word, and followed by *j*, is almost silent, the *j* alone being pronounced, with a slight liquid sound before it
S is like English *s* When followed by *k*, it is like *sk* English, in all those cases where *k* has its hard sound; but like *sh* (or French *ch*, or German *sch*) when *k* is followed by *i*, *y*, *a*, *ö*, and *e* acute, or when followed by *j* and any of the hard vowels
T is always hard.
tj, followed by a vowel, has, in common language, a sound like English *ch*, but much softer; *stj*, followed by a vowel, like *sh*

DANISH

1. Vowels.

The Danish language has eight vowels: — *a*, *e*, *i*, *o*, *u*, *y*, *å*, (*æ*,) *ø*, (*œ*.) There is but one combined vowel that changes pronunciation. The doubling of the other vowels, which hardly takes place except with *e*, *i*, *u*, indicates only the length of the syllable
The diphthongs are *ai*, *ei*, *oi*, *øi*, (*œi*,) *au*, *eu*, *ou*, *ui* These make two distinct sounds, pronounced by a single emission of the voice
A has the two sounds of German *a*, (*ä*)
aa is pronounced long *o*, (*ô*;) *ae* (*ä*) is like the corresponding German *ae*
ai is similar to the German *ai*, (*ï*.) *au* is like the German *au*.
E has the three German sounds. —
e is mute after a vowel, which it then lengthens;
(1.) at the end of substantives terminating in *i*, when they derive from the Latin *ia*;
(2.) at the end of the infinitive of verbs after a vowel, (*e* being the proper termination of the infinitive of all verbs.)
(3.) at the end of adjectives that terminate in a vowel, under the inflection;
(4.) in the middle of some words, after a long vowel, to distinguish two words, which without the *e* would have the same orthography, though the vowels have a different length in pronunciation.
ee. The vowels *e*, *i*, *u*, are doubled in the middle of monosyllables, to indicate the *e*, *i*, *u*, long, except before the consonants *b*, *d*, *g*, *v*, *p*.
ei is like the German *ei*.
eu is like the German *eu*
I is like the German *i*.
ie See *ee*.
O is like the German *o*.
oi, *øi*, or *œi*, resemble the English *oi*.
ø (*ö*) is like the German *ö*
ou is like the English *ou*.

U is like the German *u*
Ú resembles *u* French.
Y is like French *u*.

2. Consonants.

The consonants are like the English, with the following exceptions:—

D is not sounded after a consonant; and this omission is observed even when, by addition, the *d* passes into the following syllable.
After a vowel, *d* is pronounced like *th*.
G is pronounced slightly guttural after a vowel, and when it terminates the syllable.
Preceded by *n*, it gives a certain nasal sound to the *n*, without the *g* being distinctly pronounced.
H is always aspirate, and only mute before *v* and *j*.
J is like the English *y*.
R is like the German *r*
V is sometimes found after *a*, in which cases it takes the place of the vowel *u*, and combines with the preceding vowel.
W is actually no Danish consonant, but borrowed from the German language, and is only employed in words borrowed from this language. It has the sound of *v*.

NORWEGIAN

The written language being the same as the Danish, the Norwegian pronunciation differs chiefly from the Danish in the following instances:—

D is always like the English *d*.
G is always hard.
O is like the same Swedish vowel

HUNGARIAN.

1. Vowels.

A accented (*á*) has always the long *a* sound in *father*, (*a*;) unaccented, has the French short *o* sound.
E accented (*é*) resembles the *e* indicated in the following list by *ę*; unaccented, it has the German short sound in *help*.
I has the two German *i* sounds.
O accented (*ó*) has a long and deep *o* sound, (*ō*;) unaccented, has the two sounds of *morn*, *lot*.
ö (*ō*) has the two sounds of the corresponding German letter.
U accented (*ú*) has the deep and full sound of the Swedish letter *o*; unaccented, like English *oo*.
ue, or *ü*, has the two sounds of the German, *ue*, (*u*.)
Y, when a vowel, has the sound of the Hungarian *i*.

2. Consonants.

The consonants are like the English, with the following exceptions:—

C is always joined with some other consonant.
cs is like *ch*.
cz is like *ts*.
D is like English *d*. Followed by *j* or *y*, is like *d* and a gentle aspiration, nearly like the Italian *gg* followed by a vowel.
G is always hard, like *g* in the English word *go*.
gh is like a simple *g*
g, followed by *j* or *y*, is like *dj*, *dy*.
H is always aspirate.
J is like English *e*, unless preceded by *d*, *g*, *t*. (See these letters.)
R is like the German *r*.
S is like English *sh*.
sz is like *ss*.
T and *th* are always hard.
ts is like the English *ch*.
tz is like *ts*.
ty and *ty* is like *t* followed by a gentle aspiration, nearly like the Italian *cc* followed by a vowel, though the pronunciation does not sound as sharp.
Zs is like the French *j*.
Y is almost always a consonant. (See *dy*, *gy*, *ty*.) Immediately preceded by *l* and *n*, it serves to make these letters liquid, corresponding to the Spanish *ll*, *ñ*, as in *brilliant*, *onion*.

POLISH.

1. Vowels.

A has the two sounds of the German *a*.
E accented (*é*) has the German long *æ* sound; unaccented, the German short *e* sound.
I corresponds to the German *i*.
O accented is like English *oo*; unaccented, like long *o*, (*ō*.)
U is like the German *u*
Y is like the German short *i*.

2. Consonants.

B is always hard.
C is like the German *c*.
ch like the German *ch*.
cz like the English *ch*.
D, *F*, and *G*, are always hard
H is always aspirate
J is like the German *j*.
K, *L*, *M*, *N*, *P*, like the corresponding English letters; but *n* accented (*n'*) is like the Spanish *ñ*.
R is like the German *r*
S is always sharp S accented (*s*) has a sound of *s* mixed with German *j*.
sc, both accented, (*s'c'*,) resembles *sts*.
sz is like English *sh*.
T is always hard.
W is like the German *w*.
Z is like English *z*. *Z*, with a point over it, (*ż*,) is like French *j*; and *z* with an accent, (*z'*,) which has no exact equivalent in English, resembles somewhat the *ż*.

WELSH.

The consonants are divided into mutes and semivowels, and again into labials, dentals, and palatals.

The vowels are of two kinds — the immutable and the mutable.

The mutable vowels are, *a*, *e*, *o*, *w*; the vowels that suffer no change, *i*, *u*, *y*.

The consonants, under the class of mutes, are *b*, *p*, *c*, *g*, *d*, *t*.

The semivowels are vocal and aspirated.

Vocal semivowels, *z*, *x*, *l*, *m*, *n*, *r*; and the aspirates *ç*, *ng*, *ngh*, *f*, *h*, *th*.

L, *m*, *n*, *r*, are also distinguished by the name of *liquids*.

The consonants may be thus classed:—

Labials.	*Dentals.*	*Palatals.*
b, v, f, m, p, mh.	d, z, n, t, th, nh, s.	ð, ç, ngh, g, ng, h, ll, l, r.

There are various combinations of the vowels in the Welsh, forming diphthongs, triphthongs, and others, to the extent, in some cases, of six coming together.

All the vowels preserve their own primitive sounds under every circumstance of combination, without any deviation. So, therefore, whatever number come together, the sounds to be expressed are those of all such combined vowels, but rapidly passed over. There are instances of six vowels coming together, requiring so many quick inflections of the voice to express them.

The following is a list of the common combinations of the vowels:—

aa	da	ey	iy	ow	uy	wy	
ae	ei	ia	oa	ua	wa	ya	
ai	eo	ie	oe	ve	we	ye	
aw	eu	io	oi	uo	wi	yo	
ay	ew	iw	ou	uw	wo	yw	

aea	aia	aua	awa	awy	eia	euo	ewy	iau	ieu	wao	wei
aeo	aie	aue	awe	eai	eio	ewa	iae	iaw	oea	wai	wiw
aew	aio	auo	awo	eaw	eua	ewi	iai	iei	oia	waw	wyw

1. Vowels.

A, (1.) short or open *a*, in *man, bar, as, glass.*
(2.) long, or *á*, is the same sound extended, as in *care, dare.*
E, (1.) short, as in *men, bed, fervent.*
(2.) long, or *é*, as the French *é*, as in *même.*
I, (1.) long, as in *street, keep*
(2.) short, as in *king, sing.*
O, (1.) long, or *ó*, as in the words *note, bone, gone*
(2.) short, as in *go, no, got, not, lot, from.*
U has the sound of English *u* in *busy*, and of *i* as in *sin, thin, fire*
W, (1.) is sounded as *oo* in *good, hood;* and as *u* in the word *full.*
(2.) long, or *ŵ*, has the sound of *oo* in *mood, rood.*
Y, (1.) has the sound of *u*, as in the words *run, turn*, and of *i* as in *first.*
(2.) long, or *ŷ*, is sounded like the English *y* in *Sunday*, and is like the Welsh *u*, or less open than the *y* short.

2. Consonants.

The names of the consonants were anciently formed by sounding the vowel *i* after all of them; but in the present popular mode, the following are exceptions to that rule, and they begin their sounds with *c, ch, g, z, r, f, g, ng, ngh, h, ll, l, m, n, p, s*

The sounds of the consonants, like the vowels, are preserved invariably in all their combinations. The sounds of the letters must be considered as the perfect standard of the pronunciation of the Welsh language.

(A.) *Labial Sounds.*

The letters *b, v, f, m, p*, have the same sound as in English

The mutation of the *p*, denoted by *mh*, is a kind of aspirated *m*, whose power may be found by uniting the sound of *m*, in the word *am*, to *h*, in the word *here*, by a quick pronunciation of the phrase *I am here.*

(B.) *Dental Sounds.*

The *d, n, s*, are the same as the corresponding English letters.

The *z*, which is a mutation of *d*, has the soft or flat sound of *th*, as in the words *thus, neither.*

The *t* has the sound of English *t* in *not, ten, to*, but does not take the sound of *s* in any case.

The *th*, which is a mutation of *t*, has always the sharp and hard sound of English *th*, in the words *thank, both, nothing.*

The *nh*, another mutation of *t*, is a sort of aspirated *n*, whose power is perceivable in the word *inherent.*

(C.) *Palatal Sounds.*

The *h, l, n, r*, are similar to the same English letters

The *c* is always sounded like English *k.*

The *ch*, (or *čh*,) being a mutation of *c*, is a sound which has no standard in English, but is the same as the *ch* of the German, or the *χ* of the Greek.

It is produced by the contact of the tongue and the palate about the eighth of an inch farther back than when *k* is expressed

The *ngh* is another modification of *c*, the power of which may be made out in the word *Nottingham*, by suspending the breath on the letter *i*, instead of the proper division of the word

The *g* is always like the English hard *g*, as in *go, give, again, leg, peg.*

The *ll* is a sound peculiar to the Welsh; but the Spanish *ll* approaches very near to it. The sound is produced by touching the palate with the tongue, about an eighth of an inch farther back than when *l* is articulated

---

The accentuation of all words is known by one general rule; that is, such as consist of several syllables have the accent on the penultima, and upon every second syllable backwards. The same principle is applied to several monosyllables coming together, by accenting every second word to the last but one inclusively.

GAELIC.

The Gaelic language has five vowels and thirteen consonants.

1. Vowels.

A is sounded as in the English words *hall, halt*, but before *dh* and *gh*, it has often the sound of the diphthong *ao.*
E represents two different sounds —
(1.) that of the Greek *ε*, or *ea* in the English word *bear.*
(2.) that of *a* in *care*
I is like *ee* in English
O has the different sounds of *bone, morn, lot.*
U is like *oo* in *moon, fool*
The vowels are divided into broad, *a, o, u*, and small, *e, i*

In a word of two or more syllables, if the former ends with a broad vowel, the next syllable must begin with a broad vowel; if with a small vowel, with a small, though these inserted vowels are never pronounced. But in compound words, this rule may often be properly dispensed with

All the vowels are either long or short. When long, they are generally accented.

In all the syllables of polysyllables, except the first, the vowels have a short and obscure sound, as in the English words *sun, bird, mother;* and the broad, and sometimes the small, are used for one another.

There are thirteen diphthongs, which are either proper or improper

Ao and *eu* are improper, representing simple sounds; the former of which is only attainable by the ear; the latter is like that of the Greek *ε*, (*epsilon*) All the other diphthongs are proper, the sound of each of the vowels being more or less heard. In *ae, ai, ei, oi, io, ia, ua, ui*, the last vowel, and in *ia, io, iu*, the first vowel, is but faintly sounded

There are five triphthongs, *aoi, eoi, iai, iui, uai.* They are pronounced like the diphthongs *ao, eo, ia, iu, ua*, with the addition of a short *i* They are all long, and never occur but in monosyllables, or the first syllable of polysyllables

2. Consonants.

The consonants are, *b, c, d, f, g, h, l, m, n, p, r, s, t.*

Consonants are mutable or immutable

Mutable are such as, by having an *h* subjoined to them, either alter or lose their usual sound, viz, *b, c, d, f, g, m, p, s, t*

Immutable are such as are never aspirated, or have an *h* subjoined to them, viz., the liquids *l, n, r.*

After a short vowel or diphthong, the consonants are generally pronounced as when written double in English.

A consonant standing alone is sounded as if it were the initial letter of the following word, if it begins with a vowel, or as the final letter of the preceding word, if it ends with a vowel

Bh and *mh* have the sound of *v* in English *Mh*, in the middle or end of polysyllables, is either silent or stands for a gentle aspiration

C is always sounded as English *k*. *Ch* has the sound of the Greek *χ*, or of *gh* in *lough*, as the Irish pronounce it.

Dh and *gh*, in the beginning of words, are commonly sounded like the English consonant *y*. In the middle or end of words, they are often silent, or have the sound of a faint aspiration.

Fh is silent

G is always sounded as in the English words *get, good*

Ph has the sound of English *f*

S, before or after a broad vowel in the same syllable, is as in English But when immediately before or after a small vowel, it has the sound of *sh*. *S*, in the beginning of words, when preceded by the article with *t* intervening, is silent

Sh and *th*, in the beginning of words, have the sound of *h* alone

Th, after a long vowel, diphthong, or triphthong, is nearly silent; but after a short vowel or diphthong, it has the force of a rapid aspiration

The immutable consonants *l, n, r*, when initials of words, not connected with others in a sentence, have a soft double sound, to be learned only by the ear But whenever the order of construction requires that the mutable consonants should be aspirated, the immutable lose their double sound, and are pronounced nearly as in English

When the consonants *l, n, r*, have their double sound in the middle or end of words, they are written double

OBSERVATIONS ON THE TABLE.

In the preparation of the following table, the compiler has aimed at the utmost possible simplicity. For this reason, he has employed in his key as small a number of English sounds as was possible, and has preferred to refer most of the sounds in the several languages to their nearest English equivalents, rather than to introduce a separate notation and key for each language To do the last, would have been to destroy the simplicity, and, in a great measure, to defeat the object, of the table, which was designed for easy reference, by all classes of readers It will be sufficient, once for all, to observe, that certain sounds in several of the languages of Europe can be but imperfectly represented by the English letters and syllables which are given as their equivalents The Swedish *u* is represented by the English *oo* or the French *u*. The Danish *g* final, not preceded by *n*, corresponds nearly to the English *h* guttural. The Dutch *ui*, *uy*, is represented by the English *oi*. In the German, *a* is indicated by the English *a* in *far*; *g* and *ch* are marked as gutturals; *ö*, *ä*, and *ü*, *ue*, correspond to the French *eu* and *u*; *ai* is indicated by *i* long; *eu* by the English *oi* The Polish *z* has no corresponding English sound The Spanish *g* soft and *j* differ from the German *ch* guttural in being pronounced also from the palate. In the French, *u* has no corresponding English sound; *eu* is nearly like the *u* in the English *spur*; *m* and *n* nasal are indicated by *ng*, but the sound of *g* should not be heard in the pronunciation; *l mouillé* final is indicated by *ly*, *gne* final by *ny*; in both these cases, the sound of *y* consonant being added to that of the *l* and *n*, as in *brilliant* and *mignonette*; *oi* is also expressed by *wa*, *a* being sounded as in *far*, except *oin*, in which *a* is sounded as in *bat*. In all names not English, *ch* at the end of syllables not guttural is *tch*
